QUESTION 1

Which Riverbed products can be managed by the SteelCentral Controller for SteelHead? (Choose six.)

- A. SteelFusion Core
- B. SteelHead
- C. SteelCentral AppResponse
- D. SteelFusion Edge
- E. SteelHead EX
- F. SteelCentral NetProfiler
- G. SteelCentral Controller for Mobile
- H. SteelHead Interceptor

Correct Answer: ABDEGH

Answer: A,B,D,E,G,H

The SteelCentral Controller (SCC) supports monitoring only for SteelFusion Core 4.0 and later.

SCC 9.2 supports configuration and monitoring for SteelHead CX 8.6 and later.

SCC supports monitoring and partial configuration for SteelFusion Edge 4.0 and later. SCC 9.2 supports configuration and monitoring for SteelHead EX 3.0 and later.

SCC 9.2 supports monitoring only for SteelHead Mobile 4.0 and later.

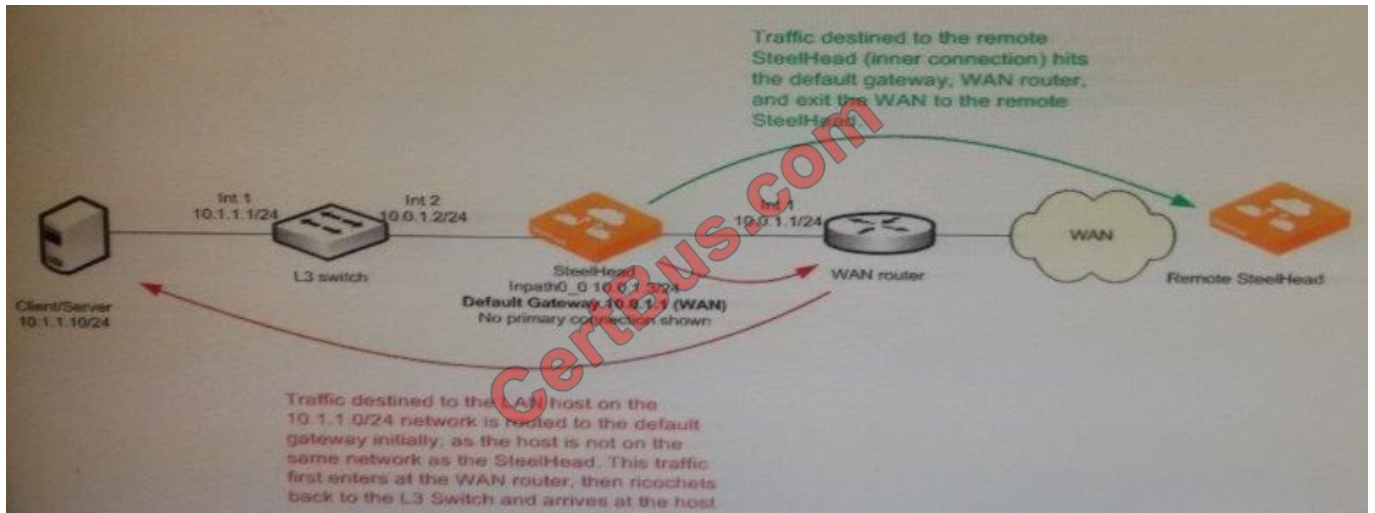

SCC 9.2 supports configuration and monitoring for SteelHead Interceptor 3.x and later.

QUESTION 2

Which SteelHead feature would resolve the packet ricochet seen in the diagram below?

- A. Simplified Routing
- B. Full Transparency
- C. Path Selection
- D. Connection Forwarding

Correct Answer: A

Simplified routing avoids situations when a packet traverses a SteelHead more than once--this behavior is called packet ricochet. In environments where the SteelHead is installed in a subnet different than the clients and servers, simplified

routing prevents packet ricochet for optimized traffic from the SteelHead. Here there is a Packet Ricochet When the SteelHead Default Gateway Is on the WAN shows an example of packet ricochet when the SteelHead default gateway is

configured for the WAN router, the host sits on a different network than the SteelHead, and simplified routing is not enabled.
