QUESTION 1

Which security measures can protect the control plane of a Cisco router? (Choose two.)

- A. CCPr
- B. Parser views
- C. Access control lists
- D. Port security
- E. CoPP

Correct Answer: AE

Table 10-3 Three Ways to Secure the Control Plane

Using CoPP or CPPr, you can specify which types of management traffic are acceptable at which levels.

For example, you could decide and configure the router to believe that SSH is acceptable at 100 packets per second, syslog is acceptable at 200 packets per second, and so on. Traffic that exceeds the thresholds can be safely dropped if it is

not from one of your specific management stations.

You can specify all those details in the policy.

You learn more about control plane security in Chapter 13, "Securing Routing Protocols and the Control Plane."

Selective Packet Discard (SPD) provides the ability to Although not necessarily a security feature,

prioritize certain types of packets (for example, routing protocol packets and Layer 2 keepalive messages, route processor [RP]). SPD provides priority of critical control plane traffic which are received by the over traffic that is less important

or, worse yet, is being sent maliciously to starve the CPU of resources required for the RP.

QUESTION 2

Which technology can be used to rate data fidelity and to provide an authenticated hash for data?

- A. Network blocking
- B. signature updates
- C. file analysis
- D. file reputation

Correct Answer: D

QUESTION 3

Which statement about communication over failover interfaces is true?

- A. All information that is sent over the failover interface is sent as clear text, but the stateful failover link is encrypted by default.
- B. All information that is sent over the failover and stateful failover interfaces is encrypted by default
- C. All information that is sent over the failover and stateful failover interfaces is sent as clear text by default
- D. Usernames, password and preshared keys are encrypted by default when they are sent over the failover and stateful failover interfaces, but other information is sent as clear text

Correct Answer: C

QUESTION 4

What are two default Cisco IOS privilege levels? (Choose two)

- A. 0
- B. 5
- C. 1
- D. 7
- E. 10
- F. 15

Correct Answer: CF

QUESTION 5

Which IPS detection method can you use to detect attacks that based on the attackers IP addresses?

- A. Policy-based
- B. Anomaly-based
- C. Reputation-based
- D. Signature-based

Correct Answer: A
