QUESTION 1

You work as a Network Administrator for World Perfect Inc. The company has a Linux-based network. You have configured a Linux Web server on the network. A user complains that the Web server is not responding to requests. The process list on the server shows multiple instances of the HTTPD process. You are required to stop the Web service. Which of the following commands will you use to resolve the issue?

- A. killall httpd
- B. endall httpd
- C. kill httpd
- D. end httpd

Correct Answer: A

QUESTION 2

You work as an Administrator for McRoberts Inc. The company has a Linux-based network. You are logged in as a non-root user on your client computer. You want to delete all files from the /garbage directory. You want that the command you will use should prompt for the root user password. Which of the following commands will you use to accomplish the task?

- A. rm -rf /garbage*
- B. del /garbage/*.*
- C. rm -rf /garbage* /SU
- D. su -c "RM -rf /garbage*"

Correct Answer: D

QUESTION 3

What is the motivation behind SYN/FIN scanning?

- A. The SYN/FIN combination is useful for signaling to certain Trojans.
- B. SYN/FIN packets are commonly used to launch denial of service attacks against BSD hosts.
- C. The crafted SYN/FIN packet sometimes gets past firewalls and filtering routers.
- D. A SYN/FIN packet is used in session hijacking to take over a session.

Correct Answer: B

QUESTION 4

When should you create the initial database for a Linux file integrity checker?

- A. Before a system is patched
- B. After a system has been compromised
- C. Before a system has been compromised
- D. During an attack

Correct Answer: C

QUESTION 5
