QUESTION 1

Which of the following describes software technologies that improve portability, manageability, and compatibility of applications by encapsulating them from the underlying operating system on which they are executed?

- A. System registry
- B. Group Policy
- C. Application virtualization
- D. System control

Correct Answer: C

QUESTION 2

What type of malware is a self-contained program that has the ability to copy itself without parasitically infecting other host code?

- A. Trojans
- B. Boot infectors
- C. Viruses
- D. Worms

Correct Answer: D

QUESTION 3

You work as a Network Administrator for McNeil Inc. The company has a Windows Server 2008 network environment. The network is configured as a Windows Active Directory-based single forest domain-based network. The company's

management has decided to provide laptops to its sales team members. These laptops are equipped with smart card readers. The laptops will be configured as wireless network clients. You are required to accomplish the following tasks:

The wireless network communication should be secured.

The laptop users should be able to use smart cards for getting authenticated.

In order to accomplish the tasks, you take the following steps:

Configure 802.1x and WEP for the wireless connections.

Configure the PEAP-MS-CHAP v2 protocol for authentication.

What will happen after you have taken these steps?

- A. The laptop users will be able to use smart cards for getting authenticated.

- B. Both tasks will be accomplished.
- C. None of the tasks will be accomplished.
- D. The wireless network communication will be secured.

Correct Answer: D

QUESTION 4

What is the maximum number of connections a normal Bluetooth device can handle at one time?
