QUESTION 1

What is used for local, physical access to hardware within a data center?

- A. SSH
- B. KVM
- C. VPN
- D. RDP

Correct Answer: B

Local, physical access in a data center is done via KVM (keyboard, video, mouse) switches.

QUESTION 2

Cryptographic keys for encrypted data stored in the cloud should be _____ .

- A. Not stored with the cloud provider.
- B. Generated with redundancy
- C. At least 128 bits long
- D. Split into groups

Correct Answer: A

Cryptographic keys should not be stored along with the data they secure, regardless of key length. We don't split crypto keys or generate redundant keys (doing so would violate the principle of secrecy necessary for keys to serve their purpose).

QUESTION 3

Which ITIL component focuses on ensuring that system resources, processes, and personnel are properly allocated to meet SLA requirements?

- A. Continuity management
- B. Availability management
- C. Configuration management
- D. Problem management

Correct Answer: B

Availability management is focused on making sure system resources, processes, personnel, and toolsets are properly allocated and secured to meet SLA requirements. Continuity management (or business continuity management) is

focused on planning for the successful restoration of systems or services after an unexpected outage, incident, or disaster. Configuration management tracks and maintains detailed information about all IT components within an organization. Problem management is focused on identifying and mitigating known problems and deficiencies before they occur.

QUESTION 4

The cloud customer will have the most control of their data and systems, and the cloud provider will have the least amount of responsibility, in which cloud computing arrangement?

- A. IaaS
- B. SaaS
- C. Community cloud
- D. PaaS

Correct Answer: A

IaaS entails the cloud customer installing and maintaining the OS, programs, and data; PaaS has the customer installing programs and data; in SaaS, the customer only uploads data. In a community cloud, data and device owners are distributed.

QUESTION 5

Which of the following service capabilities gives the cloud customer the least amount of control over configurations and deployments?

- A. Platform
- B. Infrastructure
- C. Software
- D. Desktop

Correct Answer: C

The software service capability gives the cloud customer a fully established application, where only minimal user configuration options are allowed.
