QUESTION 1

With software-defined networking, what aspect of networking is abstracted from the forwarding of traffic?

- A. Routing
- B. Session
- C. Filtering
- D. Firewalling

Correct Answer: C

With software-defined networking (SDN), the filtering of network traffic is separated from the forwarding of network traffic so that it can be independently administered.

QUESTION 2

Which type of cloud model typically presents the most challenges to a cloud customer during the "destroy" phase of the cloud data lifecycle?

- A. IaaS
- B. DaaS
- C. SaaS
- D. PaaS

Correct Answer: C

With many SaaS implementations, data is not isolated to a particular customer but rather is part of the overall application. When it comes to data destruction, a particular challenge is ensuring that all of a customer's data is completely destroyed while not impacting the data of other customers.

QUESTION 3

You are working for a cloud service provider and receive an eDiscovery order pertaining to one of your customers.

Which of the following would be the most appropriate action to take first?

- A. Take a snapshot of the virtual machines
- B. Escrow the encryption keys
- C. Copy the data
- D. Notify the customer

Correct Answer: D

When a cloud service provider receives an eDiscovery order pertaining to one of their customers, the first action they must take is to notify the customer. This allows the customer to be aware of what was received, as well as to conduct a review to determine if any challenges are necessary or warranted. Taking snapshots of virtual machines, copying data, and escrowing encryption keys are all processes involved in the actual collection of data and should not be performed until the customer has been notified of the request.

QUESTION 4

Which OSI layer does IPsec operate at?

- A. Network
- B. transport
- C. Application
- D. Presentation

Correct Answer: A

A major difference between IPsec and other protocols such as TLS is that IPsec operates at the Internet network layer rather than the application layer, allowing for complete end-to-end encryption of all communications and traffic.

QUESTION 5

What type of data does data rights management (DRM) protect?

- A. Consumer
- B. PII
- C. Financial
- D. Healthcare

Correct Answer: A

DRM applies to the protection of consumer media, such as music, publications, video, movies, and soon.
