⚙ **800,000+** Satisfied Customers

QUESTION 1

Which two statements correctly describe Normal lockdown Mode? (Choose two.)

A. In normal lockdown mode the DCUI service is running.

B. In normal lockdown mode the DCUI service is stopped.

C. ESXi Shell and SSH services are independent of lockdown mode.

D. ESXi Shell and SSH services are dependent of lockdown mode and cannot be configured.

Correct Answer: AC

QUESTION 2

A VM-Host affinity rule states that VM group "X" must run on hosts in group "Y". If all ESXi hosts in group "Y" fail, which is the resulting behavior with vSphere HA enabled?

A. The virtual machines in group "X" will failover to hosts that do not belong to group "Y", but will vMotion back to hosts in group "Y" when they become available.

B. The virtual machines in group "X" will not failover to hosts that do not belong to group "Y".

C. This scenario is not possible because vSphere HA and DRS cannot work together.

D. The virtual machines in group "X" will only fail over to hosts that do not belong to group "Y" if they are marked as "High" VM Restart Priority within vSphere HA.

Correct Answer: B

QUESTION 3

What new feature is introduced in NFS 4.1 on ESXi 6.5?

A. Storage DRS

B. KRB5i

C. IPv6

D. AUTH_SYS

Correct Answer: C

QUESTION 4

vSphere DRS helps to balance virtual machines with available resources in a vSphere cluster. What three types of resources can be taken into account for balancing? (Choose three.)

A. virtual NIC saturation of a virtual machine

B. RAM

C. storage latency

D. CPU

E. physical NIC saturation of an ESXi host

Correct Answer: BDE

QUESTION 5

Which two statements are true foe NFS v4.1 firewall behavior? (Choose two.)

A. It closes port 2049.

B. It opens port 2049.

C. It sets allowedAll flag to TRUE.

D. It sets allowedAll flag to FALSE.

Correct Answer: BC

NFS v4.1 Firewall Behavior When you mount the first NFS v4.1 datastore, ESXI enables the nfs41client rule set and sets its allowedAll flag to TRUE. This action opens port 2049 for all IP address. Unmounting an NFS v4.1 datastore does not affect the firewall state. That is, the first NFS v4.1 mount opens port 2049 and that port remains enabled unless you close it explicitly.

Label	Incoming Ports	Outgoing Ports	Protocols	Daemon	∧
☑ SynologyNasPlugin	2049	2049,111	TCP,UDP	N/A	

QUESTION 6

An administrator attempts to manually reclaim space on thin-provisioned VMFS6 volumes but finds that no additional space is being recovered. Which could be causing this?

A. vSphere 6.5 does not support manual UNMAP.

B. The manual UNMAP operation has been moved to the vSphere web client.

C. The VASA version is use is incompatible.

D. UNMAP is automated for VMFS6.

Correct Answer: D

The additional space is not recovered because UNMAP is automated for VMFS 6. To get additional space recovered using the manual reclaim process, you need to remove UMAP from being automated for VMFS

6.

QUESTION 7

Which component must be deployed before using encrypted virtual machines in a vSphere 6.5 environment?

A. vCenter Server must use CA signed certificates

B. a host with supported Trusted Platform Module

C. supported password vault

D. External Key Management Server

Correct Answer: D

QUESTION 8

In the Exhibit, each VM has a 1GHz non-expandable reservation.
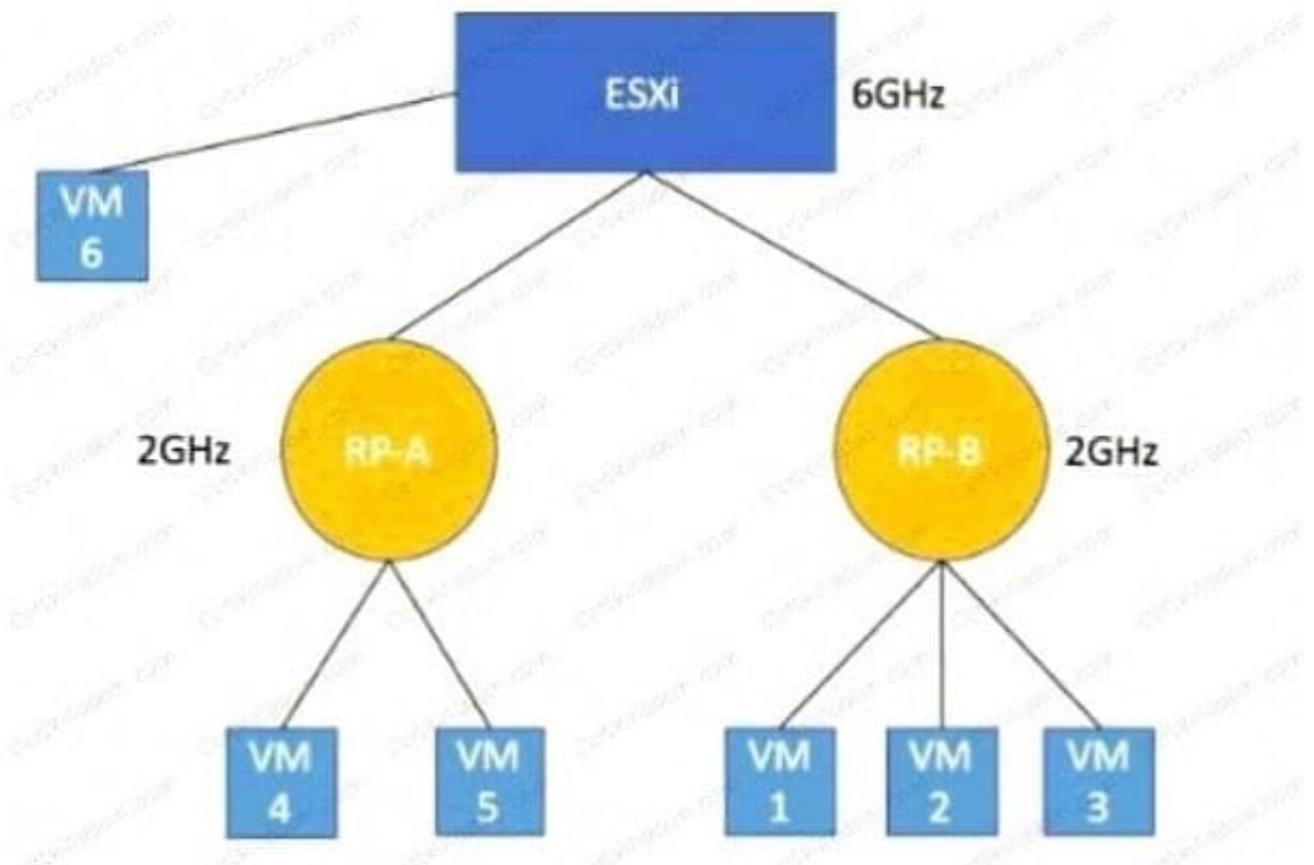

If all VMs are powered on in sequence, what would be the outcome?

A. VM3 cannot be powered on.

B. VM5 cannot be powered on.

C. VM6 cannot be powered on.

D. VM4 cannot be powered on

Correct Answer: A

QUESTION 9

A company has requested that a plan for Auto Deploy be built using VMware-recommended best practices

for networking.

Which two considerations adhere to VMware-recommended networking best practices for Auto Deploy?

(Choose two.)

A. Using IPv4 as Auto Deploy will be able to boot hosts with a legacy BIOS.

B. Using DHCP reservations for address allocations because providing fixed IP addresses through host customization is not supported.

C. Using VLANs on the management network as it offers increased performance while hosts are booting.

D. Using IPv6 as Auto Deploy will be able to boot hosts with a legacy BIOS and UEFI.

E. Using DHCP reservations for address allocations because providing fixed IP addresses through host customization is not recommended.

Correct Answer: AE

PXE booting with legacy BIOS firmware is possible only over IPv4. PXE booting with UEFI firmware is possible with either IPv4 or IPv6. Use DHCP reservations for address allocation. Fixed IP addresses are supported by the host customization mechanism, but providing input for each host is not recommended

QUESTION 10

Which three conditions could result in VMware Flash Read Cache being unable to claim a disk? (Choose three.)

A. The disk is not listed in the VMware hardware compatibility guide.

B. The disk is not detected as local.

C. The disk is not detected as an SSD.

D. The disk is in use by VMFS.

Correct Answer: BCD

QUESTION 11

Which feature facilitates the sharing of templates via vCenter Server?

A. OVF

B. vApp

C. Content Library

D. folders

Correct Answer: C

Content libraries are container objects for VM templates, vApp templates, and other types of files. vSphere administrators can use the templates in the library to deploy virtual machines and vApps in the sphere inventory. Sharing templates and files across multiple vCenter Server instances in same or different locations brings out consistency, compliance, efficiency, and automation in deploying workloads at scale.

QUESTION 12

An administrator is creating a hybrid vSAN cluster with six ESXi hosts equally distributed on three server

racks.

How can this cluster be protected from a single rack failure?

A. Allocate at least two storage controllers in each host.

B. Create at list two disk groups in each host.

C. Allocate at least two flash devices for caching in each disk group.

D. Create three fault domains in the vSAN cluster.

Correct Answer: D

QUESTION 13

Boot from SAN is supported on which three storage technologies? (Choose three.)

A. iSCSI

B. NFS 4.1

C. FC

D. VMware vSAN

E. FCoE

Correct Answer: ACE

QUESTION 14

The virtual machine log rotation size can be changed for all VMs by which two interfaces? (Choose two.)

A. vSphere Web Client

B. ESXi host client

C. esxcli

D. PowerCLI

Correct Answer: AD

QUESTION 15

Which are three supported storage requirements for vCenter Server HA? (Choose three.)

A. NFS

B. RDM

C. vSAN

D. VMFS

E. JBOD

Correct Answer: ACD

vCenter HA is supported and tested with VMFS, NFS, and vSAN datastores.
