### QUESTION 1

An administrator is configuring new probes to use with Cisco ISE and wants to use metadata to help profile the endpoints. The metadata must contain traffic information relating to the endpoints instead of industry-standard protocol information Which probe should be enabled to meet these requirements?

- A. NetFlow probe
- B. DNS probe
- C. DHCP probe
- D. SNMP query probe

Correct Answer: C

<http://www.network-node.com/blog/2016/1/2/ise-20-profiling>

---

### QUESTION 2

An administrator is adding a switch to the network that is running cisco ISE and is only for IP phones. the phones do not have the ability to authenticate via 802.1x. Which command is needed on each switch port for authentication?

- A. dot1x system-auth-control
- B. enable bypass-mac
- C. enable network-authentication
- D. mab

Correct Answer: D

---

### QUESTION 3

What is a function of client provisioning?

- A. Client provisioning ensures that endpoints receive the appropriate posture agents.
- B. Client provisioning checks a dictionary attribute with a value.
- C. Client provisioning ensures an application process is running on the endpoint.
- D. Client provisioning checks the existence, date, and versions of the file on a client.

Correct Answer: A

[https://www.cisco.com/c/en/us/td/docs/security/ise/1-2/user\\_guide/ise\\_client\\_prov.html#:~:text=After%20Cisco%20ISE%20classifies%20a,packages%20and%20profiles%2C%20if%20necessary.](https://www.cisco.com/c/en/us/td/docs/security/ise/1-2/user_guide/ise_client_prov.html#:~:text=After%20Cisco%20ISE%20classifies%20a,packages%20and%20profiles%2C%20if%20necessary.)

---

#### QUESTION 4

In which two ways can users and endpoints be classified for TrustSec?

(Choose Two.)

- A. VLAN
- B. SXP
- C. dynamic
- D. QoS
- E. SGACL

Correct Answer: AE

---

#### QUESTION 5

Which two task types are included in the Cisco ISE common tasks support for TACACS+ profiles?

(Choose two.)

- A. Firepower
- B. WLC
- C. IOS
- D. ASA
- E. Shell

Correct Answer: BE

[https://www.cisco.com/c/en/us/td/docs/security/ise/2-1/admin\\_guide/b\\_ise\\_admin\\_guide\\_21/b\\_ise\\_admin\\_guide\\_20\\_chapter\\_0100010.html](https://www.cisco.com/c/en/us/td/docs/security/ise/2-1/admin_guide/b_ise_admin_guide_21/b_ise_admin_guide_20_chapter_0100010.html)

TACACS+ Profile TACACS+ profiles control the initial login session of the device administrator. A session refers to each individual authentication, authorization, or accounting request. A session authorization request to a network device elicits

an ISE response. The response includes a token that is interpreted by the network device, which limits the commands that may be executed for the duration of a session. The authorization policy for a device administration access service can

contain a single shell profile and multiple command sets.

The TACACS+ profile definitions are split into two components:

1.

Common tasks

2.

Custom attributes

There are two views in the TACACS+ Profiles page (Work Centers > Device Administration > Policy Elements > Results > TACACS Profiles)--Task Attribute View and Raw View. Common tasks can be entered using the Task Attribute View

and custom attributes can be created in the Task Attribute View as well as the Raw View.

The Common Tasks section allows you to select and configure the frequently used attributes for a profile. The attributes that are included here are those defined by the TACACS+ protocol draft specifications. However, the values can be used

in the authorization of requests from other services. In the Task Attribute View, the ISE administrator can set the privileges that will be assigned to the device administrator. The common task types are:

1.

Shell

2.

WLC

3.

Nexus

4.

Generic

The Custom Attributes section allows you to configure additional attributes. It provides a list of attributes that are not recognized by the Common Tasks section. Each definition consists of the attribute name, an indication of whether the attribute is mandatory or optional, and the value for the attribute. In the Raw View, you can enter the mandatory attributes using a equal to (=) sign between the attribute name and its value and optional attributes are entered using an asterisk (\*) between the attribute name and its value. The attributes entered in the Raw View are reflected in the Custom Attributes section in the Task Attribute View and vice versa. The Raw View is also used to copy paste the attribute list (for example, another product's attribute list) from the clipboard onto ISE. Custom attributes can be defined for nonshell services.

---

## QUESTION 6

Which configuration is required in the Cisco ISE authentication policy to allow Central Web Authentication?

A. MAB and if user not found, continue

B. MAB and if authentication failed, continue

C. Dot1x and if user not found, continue

D. Dot1x and if authentication failed, continue

Correct Answer: A

---

#### QUESTION 7

What occurs when a Cisco ISE distributed deployment has two nodes and the secondary node is deregistered?

- A. The primary node restarts
- B. The secondary node restarts.
- C. The primary node becomes standalone
- D. Both nodes restart.

Correct Answer: D

[https://www.cisco.com/c/en/us/td/docs/security/ise/1-1-1/installation\\_guide/ise\\_install\\_guide/ise\\_deploy.html](https://www.cisco.com/c/en/us/td/docs/security/ise/1-1-1/installation_guide/ise_install_guide/ise_deploy.html)

if your deployment has two nodes and you deregister the secondary node, both nodes in this primary-secondary pair are restarted. (The former primary and secondary nodes become standalone.)

---

#### QUESTION 8

What are two requirements of generating a single signing in Cisco ISE by using a certificate provisioning portal, without generating a certificate request? (Choose two )

- A. Location the CSV file for the device MAC
- B. Select the certificate template
- C. Choose the hashing method
- D. Enter the common name
- E. Enter the IP address of the device

Correct Answer: BD

<https://www.cisco.com/c/en/us/support/docs/security/identity-services-engine/200534-ISE-2-0-Certificate-Provisioning-Portal.html>

---

#### QUESTION 9

What gives Cisco ISE an option to scan endpoints for vulnerabilities?

- A. authorization policy
- B. authentication policy

- C. authentication profile
- D. authorization profile

Correct Answer: D

---

#### QUESTION 10

A network security engineer needs to configure 802.1X port authentication to allow a single host to be authenticated for data and another single host to be authenticated for voice. Which command should the engineer run on the interface to accomplish this goal?

- A. authentication host-mode single-host
- B. authentication host-mode multi-auth
- C. authentication host-mode multi-host
- D. authentication host-mode multi-domain

Correct Answer: D

---

#### QUESTION 11

What is the deployment mode when two Cisco ISE nodes are configured in an environment?

- A. distributed
- B. active
- C. standalone
- D. standard

Correct Answer: A

---

#### QUESTION 12

An engineer is designing a new distributed deployment for Cisco ISE in the network and is considering failover options for the admin nodes. There is a need to ensure that an admin node is available for configuration of policies at all times. What is the requirement to enable this feature?

- A. one primary admin and one secondary admin node in the deployment
- B. one policy services node and one secondary admin node
- C. one policy services node and one monitoring and troubleshooting node
- D. one primary admin node and one monitoring and troubleshooting node

Correct Answer: A
