and Maintenance Exam

Version: Demo

QUESTION NO: 1

In Avaya Proactive Contact 5.0, which application can be used to enable/disable the Agent Job list feature?

- A.** Agent Application
- B.** Command User Interface (System Telnet)
- C.** Analyst
- D.** Editor

Answer: B

QUESTION NO: 2

Which hardware component is required for a hard dialer Proactive Contact 5.X?

- A.** Avaya Application Enablement Services (AES) 3.1 or later
- B.** Avaya Enhanced Network Bus Controller (ENBC)
- C.** Avaya Communication Manager (CM) 3.1 or later
- D.** TN-744-based Call Classifier Cards version "e" or later

Answer: B

QUESTION NO: 3

A system supervisor uses Editor to create a new completion code for use in a Job that will run later in the day. The job seems to start up without any problem, but when the supervisor looks at Monitor's Job Completion Code view, no agents are releasing calls using the new code.

Which two Issues would contribute to this problem? (Choose two.)

- A.** The agents did not get the email describing the new completion code and the conditions for its use.
- B.** The completion code changes are in the pending state and won't be available to agents until after the next dialing application restart.
- C.** The Proactive Contact Agent application has not been updated to use the new completion code.
- D.** Monitor is not working properly. There should be at least a few calls with the new completion code.

E. The system supervisor forgot to add the new completion code to the agent keys file associated with the job.

Answer: B,E

QUESTION NO: 4

Which three should you verify if a network connection error is suspected between the Avaya Proactive Contact 5.X server and the PG230RM? (Choose three.)

- A.** Run lanscan and landiag and look for collisions and other errors on the internal network (lan0).
- B.** Verify the name (switch1) and IP address for the PG230RM matches between the /etc/hosts on the AvayaProactiveContact server and in the Network Configuration page on the PG230RM (under the Current Internet Address).
- C.** Verify that SWITCHTYPE is set to DIGITAL in /opt/avaya/pds/etc/master.cfg on the Avaya Proactive Contact server.
- D.** Verify you have an active flashing LED light on the front of the ENBC card indicating LAN activity.
- E.** Verify that there are four swif_dg processes running on the Avaya Proactive Contact server.

Answer: A,B,E

QUESTION NO: 5

A system operator reports that agents are randomly being disconnected from Proactive Contact Agent. You have reviewed the available data and it is inconclusive. Since the problem is intermittent, you need to set up the dialer so that it will gather the data you need in the future.

Assuming that the current date is February 19, 2011, which command would you enter in the hopes of recording the next occurrence?

- A.** tail-facc*0219
- B.** check_errors 20110219
- C.** logadm -p opmon |7
- D.** logcat -p agent

Answer: C

QUESTION NO: 6

A system supervisor calls support to report that when Job Agent view in Monitor is used, agents that are on break cannot be seen.

What is the reason for this happening?

- A.** An agent who is on break is not really on a job. The supervisor should see that the agent is still on the system by looking at a Dialer Agent view Instead.
- B.** The agents are exiting out of the Proactive Contact Agent (PC Agent) application rather than using the "Go On Break" option in the PC Agent menu.
- C.** Display of agents who have used the "Go On Break" function of PC Agent application is not supported in Monitor.
- D.** Monitor may not be configured to display agents who are on break.
- E.** An agent who has used the "Go On Break" function Is shown as "Off Job" in Monitor.

Answer: D

QUESTION NO: 7

A Job is running on Avaya Proactive Contact 5.0 and the system operator notices that not enough records are selected. The operator wants to change selection criteria to select more records and re-run the call selection without stopping the job.

How can this be achieved?

- A.** Change the parameters and re-run the selection from Monitor.
- B.** Change the parameters and re-run the selection from Editor.
- C.** Change the parameters and re-run the selection from Command User Interface (CUI).
- D.** Change the parameters and re-run the selection from Analyst.

Answer: A

QUESTION NO: 8

To configure the opt-out feature for a virtual job, you need to select the check-box against "Should

'opt outs' be enabled". This enables other configuration parameters for this feature.

Which three configuration parameters are correct? (Choose three.)

- A. Opt-out Digit: 5
- B. When an opt-out happens, transfer to .. : Transfer to a VDN
- C. Message to be played when opt-out fails : 1
- D. When opt-out happens, transfer to : Transfer to an outbound job
- E. Opt out Digit: #

Answer: A,B,C

QUESTION NO: 9
