QUESTION 1

You need to recommend a solution to identify which applications must be uninstalled. What is the best recommendation? More than one answer choice may achieve the goal. Select the BEST answer.

- A. a Group Policy object (GPO) that contains an application control policy
- B. a reporting services point in Configuration Manager
- C. a Group Policy object (GPO) that contains an advanced audit policy configuration
- D. Configuration Manager clients that use compliance evaluation

Correct Answer: B

<https://technet.microsoft.com/en-us/library/mt629330.aspx>

QUESTION 2

You manage a virtualization infrastructure that has a Remote Desktop Services (RDS) deployment and a Microsoft Application Virtualization (App-V) infrastructure.

The RDS deployment contains a VDI personal desktop collection. The App-V infrastructure contains a publishing server.

You need to recommend a solution to ensure that VDI users, to whom App-V applications are published successfully, can launch the applications even if the App-V infrastructure becomes temporarily unavailable.

What should you include in the recommendation?

- A. Set-AppvClientConfiguration with the -AutoLoad switch
- B. Appv_client_setup_rds.exe with the /AUTOLOAD switch
- C. Set-AppvClientConfiguration with the -SharedContentStoreMode switch
- D. Appv_client_setup.exe with the /SHAREDCONTENTSTOREMODE switch

Correct Answer: A

QUESTION 3

You need to recommend a solution for updating App1. What should you include in the recommendation?

- A. Microsoft Updates Publisher 2011
- B. the System Update Readiness Tool
- C. Windows Intune

D. System Center 2012 R2 Operations Manager

Correct Answer: C

QUESTION 4

What is the minimum number of configuration items that you must create for the Windows Phone 8.1 users of Customer2?

- A. 1
- B. 2
- C. 3
- D. 4

Correct Answer: A

QUESTION 5

You plan to deploy Microsoft Office 365 ProPlus to all of the users in your company.

You download the Office 365 ProPlus installation files.

You need to create a Microsoft Application Virtualization (App-V) package for the Office applications.

What should you do?

- A. From a command prompt, run sftsequencer.exe.
- B. From the downloaded installation files, run setup.exe.
- C. From Windows PowerShell, run New-AppvSequencerPackage.
- D. From the Microsoft Application Virtualization Sequencer, run the Sequencing Wizard.

Correct Answer: B

QUESTION 6

You manage a Microsoft System Center 2012 R2 Configuration Manager primary site for a company named Contoso, Ltd. Contoso has a Microsoft Exchange Online subscription for contoso.com.

You need to create an Exchange Server connector to Exchange Online for contoso.com.

To which value should you set the server address URL of the connector?

- A. <https://smtp.office365.com>
- B. <https://mail.contoso.com/ecp>
- C. <https://ps.excel.com>
- D. <https://login.microsoftonline.com>

Correct Answer: B

QUESTION 7

You need to configure the client health settings to meet the compliance requirements. What should you do on the client computers?

- A. Configure the Group Policy preferences.
- B. Run client.msi and specify the DISABLESITEOPT parameter.
- C. Create a configuration baseline.
- D. Run client.msi and specify the NOTIFYONLY parameter.

Correct Answer: D

QUESTION 8

You need to configure the folder redirection policies to meet the technical requirement of Customer2. Which three actions should you perform? Each correct answer presents part of the solution.

- A. Enable user data and profiles for compliance settings.
- B. Create a baseline.
- C. Create a deployment to Collection2.
- D. Create a user data and profiles configuration item.
- E. Create a Group Policy object (GPO).
- F. Create a deployment to Collection1.

Correct Answer: ACD

QUESTION 9

You have a Microsoft System Center 2012 R2 Configuration Manager primary site named ST1.

To all client computers, you deploy the Endpoint Protection client from Configuration Manager and an antimalware policy named Policy1.

You need to ensure that the Endpoint Protection status is updated every 10 minutes in the Monitoring workspace.

What should you do?

- A. Run the Set-CMClientStatusUpdateSchedule cmdlet.
- B. Modify the Endpoint Protection status schedule summarization.
- C. Modify the Policy1 Advanced settings.
- D. Run the Set-CMClientStatusSettings cmdlet.

Correct Answer: A

QUESTION 10

You need to ensure that the personal devices that run Windows 8.1 meet the corporate security policy requirements.

What should you do first?

- A. Create a federated trust with Windows Azure Active Directory.
- B. Create a federated identity relationship with the Microsoft Federation Gateway.
- C. Enroll the device in Windows Intune.
- D. Join the devices to the domain by using an offline domain join.

Correct Answer: C

QUESTION 11

Your network contains one Active Directory domain named contoso.com.

Currently, your company is not licensed for the Microsoft Desktop Optimization Pack (MDOP).

Users have a locally installed application named App1. App1 stores its configuration in the registry.

A new version of the application named App2 is developed. Currently, App1 and App2 cannot run on the same computer due to incompatible registry settings.

Users must use App1 and App2 on the same computer for several months to verify that App2 shows the same results as App1.

You need to recommend a solution that will enable users to use both versions of the application. Users must be able to use the applications even if their computer is not connected to the network.

What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. a compatibility fix
- B. a RemoteApp program
- C. an Microsoft Application Virtualization (App-V) package
- D. a virtual machine

Correct Answer: D

QUESTION 12

Your network contains a single Active Directory domain. The functional level of the domain is Windows Server 2012 R2. The domain contains the servers configured as shown in the following table:

Server name	Role
Server1	Microsoft System Center 2012 R2 Configuration Manager primary site server
Server2	Windows Server Update Services (WSUS) server
Server3	Member server

You install Microsoft System Center Updates Publisher 2011 on Server3.

You run the Publish Software Updates Wizard to publish a third-party update from Server3, and you discover that the Automatic publish option is unavailable.

You need to ensure that the Automatic publish option is available.

What should you do?

- A. From Updates Publisher 2011, enable Configuration Manager Integration.
- B. From Updates Publisher 2011, run the Import Software Updates Catalog Wizard.
- C. Install Updates Publisher 2011 on Server1.
- D. Install Updates Publisher 2011 on Server2.

Correct Answer: A

QUESTION 13

You have a deployment of Microsoft System Center 2012 R2 Configuration Manager.

You need to ensure that you can view the client site assignment status messages of all clients by using Configuration Manager, even if the management point is unavailable.

Which site system role should the clients use?

- A. an out of band service point
- B. a reporting services point
- C. a System Health Validator point
- D. a fallback status point

Correct Answer: D

QUESTION 14

You need to meet the application requirements of App3. To which server should you install App3?

- A. Server1
- B. Server2
- C. Server3
- D. Server4

Correct Answer: C

QUESTION 15

Your company uses Windows Intune to deploy applications to remote users.

You plan to deploy several applications to three users. The users and the applications are configured as shown in the following table.

You plan to deploy the applications to Windows Intune groups. App1 and App3 will be installed automatically. App2 will be available for manual installation.

You need to identify the Windows Intune groups to create for the planned deployment.

What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Create three computer groups and three user groups.
- B. Create two computer groups and two user groups.
- C. Create two computer groups and one user group.
- D. Create one computer group and one user group.

Correct Answer: C

QUESTION 16

You need to recommend a solution to resolve the issues reported by the RDS users. What should you include in the recommendation?

- A. Run the Set-RDCertificate cmdlet.
- B. Modify the collection properties.
- C. Modify the RDWeb web application settings.
- D. Modify the RemoteApp program properties.

Correct Answer: A

QUESTION 17

Your company has a branch office that contains 50 client computers.

You deploy Windows Intune to manage the client computers.

You need to create a new policy that will change the frequency at which the computers check for updates.

Which type of policy template should you use?

- A. Windows Intune Agent Settings
- B. Windows Intune Center Settings
- C. Mobile Device Security Policy
- D. Windows Firewall Settings

Correct Answer: A

QUESTION 18

You need to provide a solution to meet the technical requirements of Baseline1.

What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Create a new collection from the baseline deployment.
- B. Modify the configuration item properties.
- C. Create a collection that has a limiting collection.
- D. Modify the collection properties.

Correct Answer: B

QUESTION 19

Your network contains one Active Directory domain. The domain contains a deployment of Microsoft System Center 2012 R2 Configuration Manager. Configuration Manager is integrated with Windows Intune. All client computers and devices

are managed by using Configuration Manager.

You have a Wi-Fi network named Wi-Fi1.

You create a Wi-Fi profile named Wi-Fi1 and provision the profile for Windows RT 8.1 devices.

You create a collection named Collection1 that contains all of the devices that run Windows RT 8.1.

You need to ensure that the users who use the Windows RT 8.1 devices can connect to Wi-Fi1 without having to configure the wireless settings manually. The Wi-Fi profile must NOT be used on any other devices.

What should you do?

- A. Deploy Wi-Fi1 to the All Users collection.
- B. Deploy Wi-Fi1 to Collection1.
- C. Deploy Wi-Fi1 to the All Mobile Devices collection.
- D. Modify the profile properties of Wi-Fi1.

Correct Answer: A

QUESTION 20

You have a deployment of Microsoft System Center 2012 R2 Configuration Manager. All site system roles are deployed. All client computers have the Configuration Manager client installed.

An application named App1 is deployed to all of the client computers. Your organization licenses App1 annually from the application vendor. The licenses are based on the number of App1 installations that exist in the organization at the end of the fiscal year.

You need to identify on which computers App1 is not being used.

What should you create first?

- A. a configuration baseline
- B. an automatic deployment rule
- C. a software category
- D. a software metering rule

Correct Answer: D
