Explanation/Reference:

Explanation:

QUESTION 28

Diego wants to run a Windows-based application on a MacBook Pro. What is a valid reason for him to use Boot Camp to do so, rather than a virtual solution like Parallels or VMWare Fusion?

- A. Boot Camp lets Diego switch between OS X and Windows applications instantly, whereas virtual solutions require Diego to restart his MacBook Pro in order to switch between the two environments and their applications.
- B. Boot Camp does NOT require Diego to buy and install Windows in order to run Windows-based

applications, whereas virtual solutions do.

- C. Diego can buy Boot Camp on the App Store for \$9.99, which is less expensive than the virtual solutions.
- D. Boot Camp runs natively without hardware-resource contention on Mac computers, so Diego will see better overall performance with Boot Camp than with virtual solutions.
