### QUESTION 1

In Apigee Edge APIs, what is fault.name?

- A. An out-of-the-box variable populated by Edge when a policy fails
- B. Custom variable that you populate before you Raise Fault
- C. System errors that are only populated in script callouts
- D. Backend error names that are populated along with error code
- E. None of the above

Correct Answer: D

---

### QUESTION 2

A customer has added response cache policy on all their search APIs, but traffic to the backend has not reduced much. They ask you to investigate, you find that GET queries are being cached and available in memory but cache misses are still high. You want to improve caching and reduce cache misses. What should you do?

- A. Use lookup/populate cache policy.
- B. Increase the TimeToLive of cached objects
- C. Review key fragments in cache key, ensuring only important parameters are used
- D. Review and increase the number of items on the cache resource to a higher number

Correct Answer: B

---

### QUESTION 3

Your APIs are configured as a relying party on an OpenID Connect platform. You need to inspect and verify the OpenID Connect identity. What two actions should you take? Choose 2 answers

- A. Verify the signature of the JWT using a shared secret.
- B. Parse the JWT to extract the exp, nbf and iat properties to determine if the token is still valid
- C. Pass the JWT to a preconfigured 3rd party for verification of the signature, exp, nbf and iat properties
- D. Use the OpenID Connect URL to locate a trusted 3rd party for verification of the signature, exp, nbf and iat properties
- E. Using the JKS URL in the OpenID Connect configuration, fetch the signing key to verify the JWT signature and parameters

Correct Answer: BE

---

#### QUESTION 4

You need to log certain data to a custom logging service while processing the response. You want to avoid processing delays due to logging during the logic flow. What should you do?

- A. Use a Node.JS target to implement a nonblocking call.
- B. Attach a Message Logging policy to the Post Client Flow
- C. Implement a Java Extension Callout with a worker thread
- D. Use an asynchronous Service Callout policy in your proxy (low as soon as you have enough data to log)

Correct Answer: A

---

#### QUESTION 5

Which features are supported in the OAuthV2 policy? Choose 3 answers

- A. Storing of external access tokens
- B. Setting custom attributes for generated access tokens
- C. Credentials validation when password grant\_type is used
- D. Setting different expiration for refresh and access tokens

Correct Answer: BCD

---

#### QUESTION 6

When populating the Quota configuration for an API product, which statement is true?

- A. The Quota specified will automatically be enforced for any Developer App Keys assigned to the API product.
- B. After validating an API key or access token, flow variables are automatically populated with the Quota configuration for later use in a Quota policy
- C. Rate limiting will be enforced precise to the seconds level, even if you configure a per-minute or higher interval
- D. The Quota configuration specified on the API product enforces a global rate limit across all API proxies

Correct Answer: C

---

#### QUESTION 7

Which versioning scheme follows Apigee's API design best practices?

- A. GET /customers/{customerid}/v1

- B. GET /customers/v1/{customerid}
- C. GET /v1/customers/{customerid}
- D. GET /customers?customend={customerid}andversion=v1

Correct Answer: D

---

#### QUESTION 8

If a string value is put in both a cache and a key value map (KVM) using the same key, which one is true?

- A. The object will expire from both locations after the TimeToLive has passed.
- B. The object will be stored in Cassandra twice
- C. When object is retrieved from KVM, the object with the same key will be returned from the cache instead to improve performance
- D. One of the inserts (either to cache or to KVM) will fail as you cant insert the same key twice

Correct Answer: A

---

#### QUESTION 9

The backend API team has asked for metrics on the performance of an API. Which two pieces of data should you provide? Choose 2 answers

- A. The internet latency
- B. The network latency
- C. The backend latency
- D. The Apigee proxy latency
- E. The backend database latency

Correct Answer: CE

---

#### QUESTION 10

Your team has the following requirements in building an API:

1.

Adhere to Pragmatic REST.

2.

Model the API to the consumption use case.

3.

Require API Key authentication

4.

Implement CORS

5.

Validate inputs.

You have begun migrating a SOAP-based web service to a REST API by using the SOAP to REST function in Apigee Edge

Which two of the above-listed requirements could be satisfied by this action? Choose 2 answers

A. Adhere to Pragmatic REST

B. Model the API to the consumption use case

C. Require API Key authentication

D. Implement CORS.

E. Validate inputs.

Correct Answer: BC

---

#### QUESTION 11

Which HTTP method would NOT be used for CRUD operations?

A. GET

B. POST

C. OPTIONS

D. PUT

Correct Answer: C

---

#### QUESTION 12

In Apigee Quota policy, if it is essential that you do NOT allow any API calls over the quota, which configuration option is used?

A. distributed, non-synchronous

B. non-distributed, synchronous

- C. distributed, synchronous
- D. non-distributed, non-synchronous

Correct Answer: A

---

### QUESTION 13

Which plugins are not enabled as part of the default Edge Microgateway installation? Choose 2 answers

- A. analytics
- B. oauth
- C. quota
- D. spike arrest

Correct Answer: CD

---

### QUESTION 14

You are using the Apigee ExtractVariables policy JSONPath feature, and discover that the query is not returning the expected result for the payload you are providing What should you do?

- A. Check that the Accept header is set to text/json
- B. Check that the Accept header is set to application/json.
- C. Check that the Content-Type header is set to text/json
- D. Check that the Content-Type header is set to application/json

Correct Answer: B

---

### QUESTION 15

Your API generates tokens to authenticate users. You have the following requirements

1.  
Limited token lifetime.
2.  
Managed key rotation.
3.  
Self-verifiable content.
- 4 Compact data representation

5. Refresh without new challenge.

You plan to use SAML2 Which two of the above-listed requirements are satisfied by using SAML2? Choose 2 answers

A. Limited token lifetime.

B. Managed key rotation

C. Self-verifiable content

D. Compact data representation

E. Refresh without a new challenge

Correct Answer: A
