QUESTION 1

While installing Lotus Traveler, Mitch wanted to provide only the client installation files on his external Web server for his mobile users. Which of the following installation types offers this ability?

A. Complete

B. Server only

C. Web site only

D. Client files only

Correct Answer: C

QUESTION 2

How does custom Java code and standard Java API libraries differ from Signed Agents when executing in a Notes client?

A. There is no difference. The signer of the XPage application will be checked against the ECL of the local workstation.

B. The permissions of the XPage application signer are checked against the Java Security Manager FCL to determine if the signer has permission to perform the operation.

C. When the code is executed the Java Security Manager passes a permission check to the Notes Client ECL to see if the XPage application signer has permission to perform the operation.

D. Custom Java code and standard Java API libraries are not bound by the local ECL like Signed Agents are. The runtime permissions are based on the XPage ECL which is contained in the XPage application.

Correct Answer: C

QUESTION 3

Users in your organization utilize Lotus Traveler for their mobile devices. They are successfully able to search for user names and telephone numbers. What is the default number of returned results in their searches?

A. 10

B. 25

C. 50

D. 100

Correct Answer: B

QUESTION 4

To specify an ID vault download time limit for users, you utilize which of the following?

A. User policy configuration

B. Administration process requests

C. Profile documents in the ID vault

D. Manual entries in the person documents

Correct Answer: A

QUESTION 5

A user ID can be uploaded to a vault if a parent certifier of the user ID has issued a vault trust certificate certifying its trust of the vault and if the associated user\\'s effective policy has which of the following?

A. A shared organizational unit certifier

B. The user\\'s home server is the same as the vault server

C. A Security Settings document that specifies the vault name

D. The user is a member of a dynamic group specifying the vault name

Correct Answer: C

QUESTION 6

The ACME corporation has implemented DAOS with encryption. To remove encryption on attachments in a large object file, which of the following steps must be performed after disabling it on the server?

A. The server ID must be utilized to open the attachments to be unencrypted

B. The user must open the attachment one time after the encryption setting is modified

C. The user must resave every document that contains the attachments to be unencrypted

D. The file must be deleted in every document that references it, so that it is deleted in the repository, then recreated

Correct Answer: D

QUESTION 7

Bailey has enabled shared login for specific Notes users in her environment. Which of the following is the result of enabling this feature?

A. Users must begin managing their Internet passwords manually

B. Users must enter their Notes passwords instead of Windows to log in

C. Roaming users can utilize only their Windows password for authentication

D. Administrators are required to manage Notes passwords and assist users who have forgotten their passwords

Correct Answer: A

QUESTION 8

Greg finds bitmap images in a document are showing as JPG format. Greg has recently enabled image compression in his Lotus Notes client. Why would the images show as JPG format?

A. JPG format is the default image format for all documents.

B. Greg has the "Convert images to JPG Format" option selected in his client preferences.

C. The bitmap image was too large. The Lotus Notes client converted the image in order to be under the attachment size quota.

D. Greg pasted the bitmap into the document. Pasting a bitmap into a document will convert the image to JPG or GIF format when image compression is turned on.

Correct Answer: D

QUESTION 9
