QUESTION 1

A customer is looking at purchasing IBM FileNet P8. As part of the bid process the system installer is installing a Proof-of-Concept (POC) P8 system. The sales team needs a solution immediately. The customer\\'s corporate standard infrastructure products are WebSphere, DB2, AIX and Active Directory. What is the best installation scenario to offer this customer?

A. Offer the Composite Platform Installation Tool (CPIT), but provide Tivoli as the LDAP.

B. Offer the CPIT tool scripts and reconfigure for the customers LDAP provider after it completes.

C. Offer the CPIT tool scripts and modify for the customers infrastructure solutions to input option.

D. Use the CPIT interactively and select the products to match the customers infrastructure input option.

Correct Answer: A

QUESTION 2

A customer is building multiple stand-alone development servers with IBM FileNet P8 V5.1, but is concerned with the amount of time required to perform all the prerequisites and configuration for each server. They are seeking input from the consultant to reduce the workload implementing this requirement. What would be the best recommendation?

A. Install the core engines and all middleware on each server using the Composite Platform Installation Tool.

B. Help them complete the Installation and Upgrade Worksheet for the first server, and install the core engines and all middleware usinginformation in the worksheet to configure the Composite Platform Installation Tool. Copy the installed directories to the remaining servers.

C. Help them complete the Installation and Upgrade Worksheet for the first server, install the core engines using the information in the worksheetand the silent install scripts on the first server. Copy the software directories to the others servers and install using the silent install scripts.

D. Help them complete the Installation and Upgrade Worksheet for the first server, install the core engines using the information in the worksheetand the standard installation. Then, copy the worksheet and replace the server names for the remaining servers and perform the installationon each server.

Correct Answer: A

QUESTION 3

A P8 Administrator wants to export a development object store to a production object store. Which tool should be used as a best practice to do accomplish this?

A. FileNet Enterprise Manager

B. FileNet Deployment Manager

C. FileNet Consistency Checker

D. FileNet Configuration Manager

Correct Answer: B

QUESTION 4

The Administrator would like to create a new object store. What other tool can be used instead of IBM FileNet Enterprise Manager (FEM)?

A. FileNet Configuration Manager (FCM)

B. Web-based FileNet Enterprise Manager (WFEM)

C. There are no other tools available to perform this specific task.

D. Web-based IBM Administrative Console for Content Engine (ACCE)

Correct Answer: D

QUESTION 5

A customer wants to install IBM FileNet Rendition Engine (RE) (uses Liquent component) in a separate physical system and needs to determine the installation sequence and configuration tasks that should be performed. What is the sequence of installation and configuration tasks that should be performed during the installation and configuration of the IBM FileNet Rendition Engine?

A. Install and configure Content Engine, install MS SQL or DB2 database for RE, install RE, configure RE connection to CE in FEM, configure AEto use path-based URLs.

B. Install and configure Content Engine, install MS SQL or Oracle database for RE, install RE, configure RE connection to CE in FEM, configureAE to use path-based URLs.

C. Install and configure Content Engine, install MS SQL or Oracle database for RE, install RE, configure RE connection to CE in Liquent DomainManager, configure AE to use path-based URLs.

D. Install and configure Content Engine, install MS SQL or Oracle database for RE, install RE, configure RE connection to CE in FEM, configureLiquent Domain Manager to use path-based URLs.

Correct Answer: B

QUESTION 6

A P8 Administrator of a company would like to use vwtool to run a trace on region 2. What would be the correct command to switch to region 2?

A. vwtool -region 2

B. vwtool:1>region 2

C. vwtool:2:>region 2

D. vwtool:1>regions 2

Correct Answer: B

QUESTION 7

Which of the following tablespaces should be created in an IBM FileNet Content Engine object store database when using DB2?

A. Data tablespace, GCD tablespace

B. User tablespace, Temporary tablespace

C. Index tablespace (Optional), Large object (Lob) tablespace (Optional)

D. Data tablespace, Index tablespace (Optional), Large object (Lob) tablespace (Optional)

Correct Answer: D

QUESTION 8

A customer would like to check the health of an IBM FileNet Content Engine deployment. Which of the following would the customer use?

A. t3://:/P8CE/Health

B. iiop://:/P8CE/Health

C. http://:/P8CE/Health

D. cemp://:/P8CE/Health

Correct Answer: C

QUESTION 9

A security administrator has been assigned the task of creating a Content Engine bootstrap account. The account must be able perform the following task: establish a connection to the application server, access the JNDI lookup tree and lookup the data source for accessing the GCD. What other function does the Content Engine bootstrap account need to perform?

A. Create the data sources for the GCD.

B. Startup the Content Engine application.

C. Startup the Content Engine background tasks.

D. Startup the Content Engine application server.

Correct Answer: C

QUESTION 10

A client is planning the implementation of an IBM FileNet P8 platform and needs to identify and plan for deployment environments. What are the installation types that should be considered while planning for a IBM FileNet P8 deployment?

A. Development and Production.

B. Preproduction, Disaster recovery, and Production.

C. Development, Test, Disaster recovery, and Production.

D. Development, Test, Preproduction, Disaster recovery, and Production.

Correct Answer: D

QUESTION 11

An instance of IBM Content Search Services server has been successfully installed. To verify the installation, the deployment specialist needs to check the value of the authentication token that was generated by the installation procedure, based upon the supplied seed, and then manually record it for later use. How can this be accomplished?

A. Inspect the installation log file - the token is recorded there.

B. Use the supplied configTool command line utility to display the value of the token.

C. Use the supplied adminTool command line utility to display the value of the token.

D. Use the supplied dumpIndex tool to recover the configuration information (including the token).

Correct Answer: B

QUESTION 12

A customer is planning for a IBM FileNet P8 environment implementation and needs to identify the solution component dependencies. What are the dependencies for Content Engine?

A. Application server and database.

B. Process Engine client files, application server, and database .

C. Process Engine client files, directory server, and application server.

D. Process Engine client files, directory server, application server, and database.

Correct Answer: D

QUESTION 13

A consultant wants to improve application response times on an existing large IBM DB2 database for an IBM FileNet P8 Content Engine. What command/s would the consultant run on DB2 to accomplish this?

A. alter table compress yes;

B. alter index compress yes;

C. alter table reorg yes;alter table allow read access;

D. alter table compress yes;reorg table allow read access;

Correct Answer: D

QUESTION 14

While testing the application server connection in FileNet Configuration Manager, the tool displays an error message stating that it failed. Which of the following would be a valid reason for the application server connection test failure?

A. The LDAP server is not running.

B. SSL is not configured correctly.

C. The LDAP parameters are incorrect.

D. The datasource parameters are incorrect.

Correct Answer: B

QUESTION 15

After completing an upgrade from IBM FileNet P8 V3.5 with Content Search Engine (CSE) to P8 V5.1 with IBM Legacy Content Search Engine (LCSE) the customer decides that they are going to move to IBM Content Search Services. What tasks need to be performed?

A. Install IBM CSS, configure IBM CSS in Enterprise Manager, migrate indexes to IBM CSS, test, disable IBM LCSE in Enterprise Manager.

B. Copy the existing search indexes to the new search engine, install IBM CSS, configure IBM CSS in Enterprise Manager, test, uninstall IBMLCSE.

C. Copy the existing search indexes to the new search engine, uninstall IBM LCSE, install IBM CSS, configure IBM CSS in Enterprise Manager,test.

D. Install IBM CSS, copy the existing search indexes to the new search engine, disable IBM LCSE in Enterprise Manager, configure IBM CSS inEnterprise Manager, test.

Correct Answer: A
