QUESTION 1

A company uses its own private cloud, which has few available resources. Mission-critical systems and other information systems are running on it. A new system will be deployed on the private cloud. The following tests are included in the test plan:

Load test (2h) Backup/restore test (6h) Functional test (8h) Failover test (1h)

The work schedule of the existing system is shown below.

	System open	System close	Batch job
ERP (mission critical)	9:00	22:00	22:00-00:00
Groupware	24h active		no batch
Internal web	24h active		06:00-08:00
Official website	24h active		00:00-00:30

To minimize the effect to the existing system, which of the following schedules is MOST suitable for the load test?

- A. 02:00-04:00
- B. 09:00-12:00
- C. 18:00-20:00
- D. 22:00-00:00

Correct Answer: C

QUESTION 2

A cloud administrator needs to configure multiple web servers to participate actively in workload processing. Which of the following will BEST help the administrator achieve this goal?

- A. Deploy availability group and enable autoscaling.
- B. Deploy availability group and enable load balancing.
- C. Deploy a reverse proxy in the DMZ.
- D. Deploy an HA group and make each website public.

Correct Answer: B

QUESTION 3

Below is the output from a troubleshooting activity:

- 1.

SaaS application is unavailable to a set of users at a single site.

2.

WAN connectivity was considered to be the cause of the problem.

3.

Upon testing, it seemed the WAN connectivity was up, but the default gateway was unreachable from the internal users.

4.

The faulty switch was replaced to bring up the connectivity.

5.

The incident was documented.

Based on the methodology, which of the following steps was overlooked during the activity?

- A. Problem identification
- B. Establish theory of probable cause
- C. Verify full system functionality
- D. Establish a plan of action and implement the solution

Correct Answer: C

QUESTION 4

Which of the following technologies enables port sharing on a single physical port?

- A. WWPN
- B. NPIV
- C. WWNN
- D. Port mapping

Correct Answer: B

QUESTION 5

When a firewall takes an incoming request for a specific IP address and redirects it to an internal host, which of the following is being used?

- A. NIS

- B. PAT
- C. NAT
- D. NIC

Correct Answer: C

QUESTION 6

A technician needs to configure a virtual NIC on a Class A IP address network. Which of the following is the default subnet mask for this network?

- A. /8
- B. /16
- C. /24
- D. /28

Correct Answer: A

<https://www.pantz.org/software/tcpip/subnetchart.html>

QUESTION 7

An administrator is configuring a website in the cloud. Which of the following secure network protocols should the administrator configure?

- A. HTTP
- B. IPSEC
- C. SSL
- D. SSH

Correct Answer: C

QUESTION 8

A cloud-based web store is experiencing poor website performance and unavailability. Which of the following approaches would prevent the issue without administrator intervention?

- A. Install and deploy a load balancer in the front of the web server.
- B. Increase the computing resources to the web server.
- C. Increase the network's bandwidth to handle the spike.

D. Partner with a cloud provider to scale the required resources as needed.

Correct Answer: A

QUESTION 9

The Chief Information Officer (CIO) has established the requirement to limit data loss to within two hours of a disaster. Which of the following terms describes this requirement?

- A. RTO
- B. RPO
- C. MTTR
- D. MTBF

Correct Answer: B

QUESTION 10

A new version of an e-commerce application was deployed using a standard template configuration of 4 vCPU and 8GB of RAM. The administrator has configured the application to automatically add 4 GB of RAM after 80% utilization of continuous use over a period of time.

Which of the following testing techniques should be used to test this scenario?

- A. Integration testing
- B. Load testing
- C. Penetration testing
- D. Automation testing

Correct Answer: B

QUESTION 11

Recent feedback from an employee engagement survey stated that users are frustrated with multiple logins to different SaaS providers, and the cloud engineering teams is directed to address this issue and implement a solution. The security policy states that users must access the SaaS from approved IP addresses.

Which of the following is the BEST and most efficient solution to deploy?

- A. Deploy an IPSec tunnel to each SaaS provider and enable biometric login.

- B. Deploy a smart card login and change passwords to each SaaS vendor every 30 days.
- C. Deploy a CASB solution and whitelist the approved SaaS applications.
- D. Deploy SSO and enforce VPN access to the corporate domain.

Correct Answer: D

QUESTION 12

Which of the following would MOST likely require a cold migration?

- A. Moving VMs between hosts on different continents
- B. Moving VMs between hosts with different RAM configurations
- C. Moving VMs between hosts with different CPU architectures
- D. Moving VMs between hosts in different network segments

Correct Answer: C

QUESTION 13

An administrator is called in to determine why a virtual desktop has been unable to connect to the corporate network. Which of the following should be run to determine if the adapter is enabled? (Select TWO).

- A. ipconfig
- B. netstat
- C. ping
- D. ifconfig
- E. iwconfig

Correct Answer: AD

QUESTION 14

Joe, a customer, wants to implement backup of his replicated VMs so production performance is not affected at the primary site. Which of the following backup methods would be the MOST appropriate?

- A. Snapshot-based backup at the secondary site
- B. Mirroring to a third site from the primary site
- C. Agent-based backup at the primary site
- D. Agent-based backup at the secondary site

Correct Answer: C

Reference <https://docs.microsoft.com/en-us/azure/virtual-machines/linux/backup-and-disaster-recovery-for-azure-iaas-disks>

QUESTION 15

Users are reporting slow performance on a virtual server. An administrator notices that the virtual CPU is at 50%. Which of the following should the administrator check on the host?

- A. I/O throttling
- B. CPU wait time
- C. Swap files
- D. Memory ballooning

Correct Answer: B
