#### QUESTION 1

A network technician travels to a remote office to set up a new SOHO for the company. Wireless networking should be used at the remote office. The network technician sets up all the related wireless network equipment, and the last step is to connect the users\' devices to the company network. To complete this step, which of the following should be used to secure the remote network location?

- A. Host-based firewalls
- B. WPA2/WPA
- C. Open access
- D. Port filtering

Correct Answer: B

---

#### QUESTION 2

A network engineer is adding a second router to the company\'s topology to connect a new wing of the building. The second router will be in the same server room as the first router and does not support auto-MDIX. Which of the following describes how the routers should be connected to each other?

- A. Connect the second router to the first router with a crossover cable.
- B. Use a straight-through cable to connect the two routers together.
- C. Connect the two routers with vendor-specific console cables.
- D. Connect the AUX ports directly between the two routers.

Correct Answer: A

---

#### QUESTION 3

A network administrator is installing a campus network of two routers, 24 switches, 76 APs, and 492 VoIP phone sets. Which of the following additional devices should the administrator install to help manage this network?

- A. VoIP PBX
- B. Content filter
- C. RADIUS server
- D. Wireless controller

Correct Answer: D

---

#### QUESTION 4

Ann, a network technician, has just installed a fiber switch in a datacenter. To run the fiber cabling, Ann plans the cable route over the top of the rack using the cable trays, down to the switch, coiling up any excess cable. As Ann configures the switch, she notices several messages in the logging buffer stating the receive signal of the SFP is too weak. Which of the following is MOST likely the cause of the errors in the logging buffer?

- A. Bend radius exceeded
- B. Fiber cable mismatch
- C. Fiber type mismatch
- D. Bad fiber switch

Correct Answer: A

---

#### QUESTION 5

A technician is configuring a new email server and needs to modify DNS records. Which of the following records should the technician update to ensure email functions as expected?

- A. MX
- B. CNAME
- C. AAAA
- D. SRV

Correct Answer: A

---

#### QUESTION 6

A disgruntled employee executes a man-in-the-middle attack on the company network. Layer 2 traffic destined for the gateway is redirected to the employee's computer. This type of attack is an example of:

- A. ARP cache poisoning
- B. IP spoofing
- C. amplified DNS attack
- D. evil twin

Correct Answer: A

---

#### QUESTION 7

Which of the following mediums is circuit switched?

- A. PSTN

- B. ATM
- C. Frame relay
- D. MPLS

Correct Answer: A

---

#### QUESTION 8

A network manager notices several outages have occurred due to modifications that were made without being properly tested. Which of the following will the network manager MOST likely implement to prevent future occurrences?

- A. Logical diagram
- B. Change management
- C. IDF documentation
- D. Configuration baseline

Correct Answer: B

---

#### QUESTION 9

Which of the following may state: "Employees may not browse social media websites from company- owned computers?"

- A. AUP
- B. BYOD
- C. NDA
- D. SLA

Correct Answer: A

---

#### QUESTION 10

A network technician is configuring network addresses and port numbers for a router ACL to block a peer- to-peer application. Which of the following is the HIGHEST layer of the OSI model at which this router ACL operates?

- A. Transport
- B. Network
- C. Session
- D. Application

Correct Answer: A

---

#### QUESTION 11

An employee reports an error when visiting a website using SSL, and a message is displayed warning of an invalid certificate. Which of the following could be occurring?

- A. Phishing
- B. DDoS
- C. Evil twin
- D. MITM
- E. OCSP stapling

Correct Answer: C

---

#### QUESTION 12

A company's server-naming convention is overly complicated. The systems administrator wants to change the naming convention to make it easier for users to remember which hosts they should log into. However, renaming servers is complicated and requires some downtime. Which of the following DNS record types would accomplish this goal without requiring servers to be renamed?

- A. TXT
- B. A
- C. SRV
- D. CNAME

Correct Answer: D

---

#### QUESTION 13

A request is made to open an additional port on a firewall. The request is approved, and the port is opened. Which of the following BEST describes this process?

- A. Standard operating procedure
- B. Process management
- C. Project management
- D. Change management

Correct Answer: D

---

#### QUESTION 14

A company has decided to allow certain users to work remotely by opening up a VPN connection through the firewall. The security policy has been updated to allow VPN connections only from certain users and to specific areas on the network. Along with configuring the correct policies on the firewall, which of the following also needs to be configured on users' mobile devices to allow these VPN connections?

- A. VNC application
- B. Kerberos
- C. Geotagging application
- D. Credentials

Correct Answer: D

---

#### QUESTION 15

A network engineer for a manufacturing company is implementing a wireless network that provides reliable coverage throughout the facility. There are several large, electric, motorized machines installed on the shop floor for automating the manufacturing process. These machines are known to be significant sources of RF interference. Which of the following frequencies should the wireless network use to MINIMIZE this interference?

- A. 2.4 GHz
- B. 56MHz
- C. 5GHz
- D. 900MHz

Correct Answer: C
