---

#### QUESTION 4

What role does FortiWeb play in ensuring PCI DSS compliance?

- A. PCI specifically requires a WAF
- B. Provides credit card processing capabilities

- C. Provide ability to securely process cash transactions
- D. Provides load balancing between multiple web servers

Correct Answer: B

---

#### QUESTION 5

An e-commerce web app is used by small businesses. Clients often access it from offices behind a router, where clients are on an IPv4 private network LAN. You need to protect the web application from denial of service attacks that use request floods.

What FortiWeb feature should you configure?

- A. Enable "Shared IP" and configure the separate rate limits for requests from NATted source IPs.
- B. Configure FortiWeb to use "X-Forwarded-For:" headers to find each client's private network IP, and to block attacks using that.
- C. Enable SYN cookies.
- D. Configure a server policy that matches requests from shared Internet connections.

Correct Answer: C
