Vendor: IBM

Exam Code: C2010-590

Exam Name: IBM Tivoli Storage Manager V6.3
Implementation

Version: Demo

Topic 1, Volume A

QUESTION NO: 1

Which application can be used to gather and analyze performance data about backup and restore operations for an IBM Tivoli Storage Manager client?

- A. Information Center
- B. Administration Center
- C. Tivoli Data Warehouse
- D. IBM Tivoli Enterprise Console

Answer: B

Explanation:

QUESTION NO: 2

What must be set to enable client-side deduplication with IBM Tivoli Storage Manager V6.3?

- A. The DEDUPLICATION option on the client must be set to CLIENT.
- B. The DEDUPLICATION option on the client must be set to CLIENTORSERVER.
- C. The primary storage pool must be a random-access DISK storage pool that is enabled for data deduplication.
- D. The primary storage pool must be a sequential-access FILE storage pool that is enabled for data deduplication.

Answer: D

Explanation:

QUESTION NO: 3

Which command checks the deduplication statistics for client CRSERVER after a backup or archive?

- A. q actlog search=dedup
- B. q node info=dedupstat
- C. q actlog search=CR SERVER
- D. q dedupstat node=CR SERVER

Answer: C

Explanation:

QUESTION NO: 4

A customer is planning to install IBM Tivoli Storage Manager V6.3 (TSM) in their environment. Which configuration is optimal for this implementation?

- A. One disk for the operating system and all TSM-related logs and disk pools.
- B. One disk for the operating system, one disk for dbdir, activelog, archive log, and diskpool.
- C. One partition for dbdir, one partition for activelog and archive log, one partition for diskpool and one partition for the operating system.
- D. Separate disks for the operating system, dbdir, activelog, and archive log dirs. and a number of disks for diskpool on separate controllers.

Answer: D

Explanation:

QUESTION NO: 5

A NetApp filer has multiple volumes defined; some are exported with NFS and some are exported with CIFS. What should be considered when the backup will be done with the SnapDiff function of the incremental backup?

- A. SnapDiff works only with volumes of security style NTFS.
- B. The security style of the volume is independent from the kind of backup.
- C. Volumes with security style mixed can be backed up with Windows or AIX.
- D. Volumes with security style UNIX must be backed up with an AIX or Linux client.

Answer: D

Explanation:

QUESTION NO: 6

The dsmicf gx utility was used to install and configure a new IBM Tivoli Storage Manager V6.3 (TSM) Server instance. During the installation process a problem occurred. The configuration process must be restarted. Which command removes the created TSM database?

- A. db2 drop TSMDB1
- B. db2 list db directory

-
- C. dsmserv removedb TSMDB1
 - D. dsmserv db remove TSMDB1

Answer: C

Explanation:

QUESTION NO: 7

Which IBM Tivoli Storage Manager V6.3 (TSM) function can reduce the amount of data transferred for a VMware backup?

- A. Client-side deduplication
- B. Server-side deduplication
- C. TSM API with VMware compression
- D. TSM API with VMware deduplication

Answer: A

Explanation:

QUESTION NO: 8

Where is the schedlogname option changed?

- A. In the client options file
- B. In the server options file
- C. In the Administration Center
- D. At the operating system command prompt

Answer: A

Explanation:

QUESTION NO: 9

What is the default install directory for the IBM Tivoli Storage Manager V6.3 Windows client?

- A. Program Files\TSM\install
- B. Program Files (X86)\Tivoli\TSM
- C. Program Files\Tivoli\TSM\config

D. Program Files\Tivoli\TSM\baclient

Answer: D

Explanation:

QUESTION NO: 10

The customer's Service Level Agreement states that the network attached storage (NAS) filer should be protected so that a single file restore is possible. What prerequisite must be met so that a network data management protocol backup with a Table of Content (TOC) is possible?

- A. A TOC storage pool must be available.
- B. The server option toc=always must be set.
- C. The client option single file restore=yes must be defined
- D. A management class with copygroup value tocdestination must be available and assigned.

Answer: D

Explanation:

QUESTION NO: 11

An administrator wants to protect the Active Directory on a Windows Server 2008 R2 and so enables snapshot support via volume shadow service. Which domain statement in dsm.opt will enable a successful backup of the Active Directory?

- A. Domain ALL-LOCAL
- B. Domain ALL-LOCAL +ADS
- C. Domain ALL-LOCAL -SystemState
- D. Domain ALL-LOCAL -SystemObject

Answer: A

Explanation:

QUESTION NO: 12

A tape cartridge was inserted into the library TSMLIB1 to be used as a scratch tape. Which command will make volume VOLUMEJ a scratch volume?

-
- A. CHECKIn LIBVolume TSMLIBI SEARCH=Bulk CHECKLabel=Barcode STATus=Scratch
 - B. CHECKIn LIBVolume TSMLIBI VOLUMEJ SEARCH=No CHECKLabel=Barcode STATus=SCRatch
 - C. CHECKIn LIBVolume TSMLIBI SEARCH=Bulk VOLRange=VOLUMEJ CHECKLabel=Yes STATus=SCRatch
 - D. CHECKIn LIBVolume TSMLIBI SEARCH=No VOLRange=VOLUMEJ CHECKLabel=Barcode STATus=SCRatch

Answer: B

Explanation:

QUESTION NO: 13

Where is the default location for the IBM Tivoli Integrated Portal installation logs for an AIX installation?

- A. /varyTIP/tsm
- B. /optmp/tsm
- C. /var/tivoli/tsm
- D. /opt/tivoli/tsm

Answer: C

Explanation:

QUESTION NO: 14

An administrator has been requested to:

- list all the files in a backup set on the IBM Tivoli Storage Manager client node LONDON
- create a file called LONDON_Filelist.txt. Which command completes these actions?

- A. LIST BACKUPSETCONTENTS LONDON backup_set_name
- B. query BACKUPCONTENTS LONDON > LONDON_Filelist.txt
- C. query BACKUPSETCONTENTS LONDON backup_set_name > LONDON_Filelist.txt
- D. select BACKUPSETCONTENTS LONDON backup set name send to > LONDON Filelist.txt

Answer: C

Explanation:

QUESTION NO: 15

An IBM Tivoli Storage Manager (TSM) administrator used the Convert to Custom maintenance script in the Admin Center selective task to edit the predefined maintenance script created after the TSM Server installation using the wizard. What is the effect of this action?

- A. The maintenance script can be modified using the wizard again.
- B. The maintenance script cannot be changed using the wizard any longer.
- C. The maintenance script can be scheduled only with the schedtype enhanced.
- D. The maintenance script can be reconverted by the selective task Reconvert To in the Admin Center.

Answer: B

Explanation:

QUESTION NO: 16

In a busy IBM Tivoli Storage Manager V6.3 Server environment some failed backups have gone unnoticed for a few days. The administrator knows that they occurred around 5 days ago at 8:30 in the morning. Which command could the administrator issue to find information about the failed backups?

- A. q act se=-5 begint=08:30
- B. q act begint=-5 begin=08:30
- C. q act begin=-5 begint=08:30
- D. q log begin=-5 begint=08:30

Answer: C

Explanation:

QUESTION NO: 17

Which command configures the Disaster Recovery Manager to expire old database backup volumes?

- A. DBBACKUPPRUNEDAYS
- B. EXPIREDBBACKUP DAYS
- C. SET DRMDBEXPIRATION DAYS
- D. SET DRMDBBACKUPEXPIREDDAYS

Answer: D

Explanation:

QUESTION NO: 18

After a holiday weekend, an administrator returns to the office to find there have been problems with IBM Tivoli Storage Manager. The activity log is checked and because there are only two days worth of logs, the part of the log containing information about when the error occurred is no longer available. Which command should be run to ensure that this does not happen again?

- A. set logretention 5
- B. set actlogretention 5
- C. set actlogretention 0
- D. set actlogretention 5 mgmtstyle=size

Answer: B

Explanation:

QUESTION NO: 19

An administrator is upgrading an IBM Tivoli Storage Manager Server from V6.2 to V6.3. Which file cannot be recreated if the V6.2 database is damaged?

- A. the client options file
- B. the server options file
- C. the volume history file
- D. the device configuration file

Answer: C

Explanation:

QUESTION NO: 20

During the backup of a network attached storage filer this error occurred:

The table of contents cannot be created (ANR1110E).

The backup node command was included in a server script and has the option toc=yes. What is the reason for the error?

-
- A. The TOC storage pool was not available
 - B. The correct option is TOC=if available.
 - C. The backup was type snapm where toc=yes is not allowed.
 - D. The assigned management class did not have a TOC destination.

Answer: D

Explanation:

QUESTION NO: 21

An existing networked IBM Tivoli Storage Manager (TSM) environment exists and client node W12A201 needs all of its data to be migrated to a new TSM Server. How can this be accomplished?

- A. on the target server, issue import node W12A201 filedata=all
- B. on the target server, issue import client W12A201 filedata=all
- C. on the source server, issue export client W12A201 filedata=all
- D. on the source server, issue export server node=W12A201 filedata=all

Answer: A

Explanation:

QUESTION NO: 22

Given an IBM Tivoli Storage Manager (TSM) installation where tape drives often show as offline or tape volumes are set as read-only, other than operating system logs and tape cleaning, which two areas might a TSM administrator investigate to analyze the cause of these problems'? (Choose two.)

- A. SAN zoning
- B. ONLINE tape log
- C. NIC power supply
- D. OFFLINE tape log
- E. firmware mismatch

Answer: A,E

Explanation:

QUESTION NO: 23

A company is mandated to retain all archived data for seven years. Which two parameters must be added to the define copy group command to support this policy? (Choose two.)

- A. RETMIN=7
- B. RETVER=2555
- C. TYPE=ARCHIVE
- D. MODE=ARCHIVE
- E. RETINIT=CREATION

Answer: B,C

Explanation:

QUESTION NO: 24

Which parameter in the IBM Tivoli Storage Manager client option file is used to specify the directory where the password file is stored?

- A. passfolder
- B. passworddir
- C. passwotdfile
- D. dirtopassword

Answer: B

Explanation:

QUESTION NO: 25

Which process should be complete before the IBM Tivoli Storage Manager database is backed up?

- A. Migration
- B. Reclamation
- C. client data backups
- D. storage pool backups

Answer: D

Explanation:

QUESTION NO: 26

An IBM Tivoli Storage Manager (TSM) administrator has set up and enabled Disaster Recovery Manager. The administrator wants to return tapes that are empty from the vault to the library as scratch. The administrator issues the command:

```
move drmedia * wherestate=vaultretrieve
```

None of the tapes that were in value retrieve state have been returned to scratch even though they have been placed back in the library. What caused this to happen?

- A. The tapes are in COURERRETREVE state and must be moved to MOUNTABLE state.
- B. The tapes are in VAULTRETRIEVE state and must be moved to COURERRETREVE state.
- C. The tapes are in COURERRETREVE state and must be moved to NOTMOUNTABLE state.
- D. The tapes are in COURERRETREVE state and must be moved to ONSITERETREVE state.

Answer: D

Explanation:

QUESTION NO: 27

What is the name of the default client options file on Windows?

- A. clopt.txt
- B. dsm.sys
- C. dsm.opt
- D. client.opt

Answer: C

Explanation:

QUESTION NO: 28

On the IBM Tivoli Storage Manager V6.3 Server, what is required for a clustered server to be backed up in all cases?

- A. Nodename is set to cluster.

-
- B. Nodename is set to active failover.
 - C. Nodename for the cluster server must be registered.
 - D. Nodename for each server in the cluster must be registered

Answer: C

Explanation:

QUESTION NO: 29

How are daily maintenance tasks configured in IBM Tivoli Storage Manager V6.3?

- A. configure client schedules
- B. configure automatic TIP scripts
- C. configure administrative schedules
- D. configure automatic activity log scripts

Answer: C

Explanation:

QUESTION NO: 30

What is the default name of the IBM Tivoli Storage Manager Server at installation?

- A. tsm
- B. server1
- C. tsmserver
- D. tsm server1

Answer: C

Explanation:

QUESTION NO: 31

What configuration changes should be considered when running data deduplication on an IBM Tivoli Storage Manager V6.3 Server?

- A. create an active log mirror
- B. create an archive log mirror

-
- C. increase the size of the active log
 - D. change the backup pool to RAID 10

Answer: C

Explanation:

QUESTION NO: 32

Which option is added to the IBM Tivoli Storage Manager client options file to enhance security between the client and server?

- A. tcpsecurity
- B. encryptiontype
- C. enablesecurity
- D. enableencryption

Answer: B

Explanation:

QUESTION NO: 33

Where can IBM Tivoli Storage Manager V6.3 (TSM) Server and client updates, fixpacks, and maintenance levels be found?

- A. TSM Support Website
- B. Tivoli Data Warehouse
- C. IBM Tivoli Enterprise Portal
- D. TSM Administration Center

Answer: A

Explanation:

QUESTION NO: 34

How are volumes created for an IBM Tivoli Storage Manager V6.3 database backup?

- A. define dbvol
- B. format volume type=dbb

-
- C. they are created when the backup runs
 - D. they are created during database initialization

Answer: D

Explanation:

QUESTION NO: 35

During daily processing, which process moves data to the next storage pool in the chain?

- A. Migration
- B. Reclamation
- C. database backup
- D. storage pool backup

Answer: A

Explanation:

QUESTION NO: 36

Which backup method improves performance of incremental and selective backups by tracking the changed files rather than file scanning?

- A. no query backup
- B. disk cached backup
- C. journal-based backup
- D. change backtracking backup

Answer: C

Explanation:

QUESTION NO: 37

Which statement is true about the dsrmicfgx program?

- A. It must run as a user ID that will own the server instance.
- B. It can only run if the data base volume is already formatted.
- C. It will create the active log directory for the IBM DB2 database.

D. It can only be run as root on AIX or administrative user on Windows.

Answer: D

Explanation:

QUESTION NO: 38

Which TSM Server configuration parameters affect network connectivity?

- A. TCPWINDOW, TCPBUFFER
- B. TCPTIMEOUT, TCPFRAMEOUT
- C. COMMTIMEOUT, IDLETIMEOUT
- D. CONNECTTIME, DISCONNECTTIME

Answer: C

Explanation:

QUESTION NO: 39

The first time a backup of client data is run, what type of backup is performed?

- A. Full
- B. Snapshot
- C. differential
- D. incremental

Answer: D

Explanation:

QUESTION NO: 40

Which command specifies the parameters to define the simultaneous write function?

- A. define node
- B. define stgpool
- C. define devclass
- D. define copygroup

Answer: B

Explanation:

QUESTION NO: 41

What can be done to monitor an IBM Tivoli Storage Manager V6.3 (TSM) Server environment?

- A. install IBM DB2 reporting tools
- B. install IBM Tivoli Integrated Portal
- C. install a Backup-Archive client agent
- D. install the Cognos engine on the TSM Server

Answer: B

Explanation:

QUESTION NO: 42

Which communication method can be used only when the IBM Tivoli Storage Manager V6.3 (TSM) Server and TSM client V6.3 are on the same system?

- A. NDMP
- B. V6TCPIP
- C. NAMEDPIPE
- D. SHAREDMEM

Answer: D

Explanation:

QUESTION NO: 43

A company writes a Service level Agreement (SLA) for their backup customers. They agree to backup files every day regardless of whether the files have been modified, and to retain up to 10 backup versions of a file while the file exists on the client file system. Each customer will have their own domain, policy set, management class, and storage pool based on their department name. Which command creates a backup copy group for the Accounting department and meets the SLA requirements?

- A. define copygroup accounting type=backup destination=accounting_pool verexists=10

mode=absolute

B. define copygroup accounting accounting accounting standard type=backup destination= accounting_pool verexists=10

C. define copygroup accounting accounting accounting type=backup destination= accounting_pool verexists=10 mode=serialization

D. define copygroup accounting accounting accounting standard type=backup destination=accounting_pool verexists=10 mode=absolute

Answer: D

Explanation:

QUESTION NO: 44

Where is the value for the number of backup versions specified?

A. active copy group

B. backup copy group

C. backup management class

D. standard management class

Answer: B

Explanation:

QUESTION NO: 45

How is the name and size of the IBM Tivoli Storage Manager V6.3 active log displayed?

A. DSMSERV DISPLAY LOG

B. DSMSERV Display Logsize

C. DSMSERV DISPLAY ACTIVELOG

D. DSMSERV Display ACTIVELOGSIZE

Answer: A

Explanation:

QUESTION NO: 46

Which statement defines a client schedule to be executed ever/ week from Monday to Friday?

-
- A.** DEFINE SCHEDULE WIN Sched_Weekday act=INCREMENTAL pri=5 dur=1 duru=HOURS day=anyweekday schedstyle=e
- B.** DEFINE SCHEDULE WIN Sched_Weekdayact=INCREMENTALpri=5dur=1 duru=HOURS day=any-weekend schedstyle=e
- C.** DEFINE SCHEDULE WIN Sched_Weekdayact=INCREMENTAL pri=5 dur=1 duru=HOURS day=rno.tu .we.th.fr schedstyle=e
- D.** DEFINE SCHEDULE WIN Sched_Weekdayact=INCREMENTALpri=5dur=1 duru=HOURS day=mo+tu+we+th+fr schedslyle=e

Answer: C

Explanation:

QUESTION NO: 47

Which command identifies the IBM DB2 log file location?

- A.** db2 set logs
- B.** db2 list logs
- C.** db2adutl query
- D.** db2 get dbm cfg

Answer: D

Explanation:

QUESTION NO: 48

A customer is currently running IBM Tivoli Storage Manager (TSM) Server V5.5 on a Solaris 10 system with 4 GB memory and 50GB internal disk space. They wish to upgrade to TSM V6.3. Where should the customer check to see if their environment meets the system requirements for TSM V6.3?

- A.** ADSM.org website
- B.** IBM TSM V6.3 Administrator's Guide
- C.** IBM TSM V6.3 Administrator's Reference
- D.** IBM TSM Supported Platforms website on IBM.com

Answer: D

Explanation:

QUESTION NO: 49

Which two functions provide an offsite data storage solution? (Choose two.)

- A. collocation
- B. reclamation
- C. node replication
- D. collocation by group
- E. server-to-server communication

Answer: C,E

Explanation:

QUESTION NO: 50

What type of database backup clears the archive log?

- A. Full
- B. Snapshot
- C. Differential
- D. Incremental

Answer: B

Explanation:

QUESTION NO: 51

Which application views the client schedules status reports of IBM Tivoli Storage Manager V6.3?

- A. Administration Center
- B. Tivoli Data Warehouse
- C. Storage Reporting Agent
- D. IBM Tivoli Enterprise Portal

Answer: A

Explanation:

QUESTION NO: 52

The IBM Tivoli Storage Manager client is started and the administrator has to insert the node password. The login process then indicates that server access is refused. Why?

- A. This is normal the first time.
- B. The TSM Server is not found.
- C. The TCP/IP connection returns-50.
- D. The access to the server is disabled.

Answer: D

Explanation:

QUESTION NO: 53

An administrator successfully installed IBM Tivoli Monitoring (ITM) for IBM Tivoli Storage Manager V6.3 (TSM) on a Windows Server 2008 R2. The agent instance was configured for monitoring the TSM Server. What must be installed to enable historical data reporting and monitoring?

- A. IBMDB2V9.7
- B. TSM Server V6.3
- C. TSM Administration Center V6.3
- D. TSM Backup-Archive Client V6.3

Answer: C

Explanation:

QUESTION NO: 54

Which type of storage pools can be chained together to create a storage hierarchy?

- A. copy storage pools only
- B. primary storage pools only
- C. primary and copy storage pools
- D. copy and active data storage pools

Answer: B

Explanation:

QUESTION NO: 55

On a file server there is a folder with accounting data inside called veryimportant. The backup is done by schedule and the users may backup the data through the GUI. On the IBM Tivoli Storage Manager (TSM) Server several management classes are implemented.

MC_1 verexist=30verdel=1 retonly=31 retextra=31

MC_2 verexist=7 verdel=7 retonly=31 retextra=31

MC_3verexist=nolimitverdel=nolimitretonly=31 retextra=31

MC_4 verexist=nolimitverdel=7 retonly=31 retextra=31

The compliance officer wants the data in the folder very_important to be kept 30 days on TSM, no matter if the file is deleted or not in this time. What is the right include statement to guarantee this Service Level Agreement?

- A. Include "*" : \ . . . \very_important\ . . . * . * " MC_3
- B. Include "*" : \ . . . \very_important\ . . . * . * " MC_4
- C. Include "*" : \ . . . \very_important\ . . . * . * " MC_1
- D. Include "*" : \ . . . \very_important\ . . . * . * " MC_2

Answer: A

Explanation:

QUESTION NO: 56

The IBM Tivoli Storage Manager V6.3 (TSM) Server is installed on a system. The installation was successful and the TSM Server is started in the background. Which additional task must the administrator do to complete the installation?

- A. register node
- B. register license
- C. set eventretention
- D. set actlogretention

Answer: B

Explanation:

QUESTION NO: 57

What must be done when manually configuring the API for the IBM Tivoli Storage Manager V6.3

Server database backup?

- A. define db2cmd
- B. enable DSM format
- C. create a file called tsmdbmgr.opt
- D. issue the command to generate the IBM DB2 backup file

Answer: C

Explanation:

QUESTION NO: 58

Which command will reset the migration setting so a file remains in a storage pool for one week before it is eligible for migration?

- A. UPDATE STGPOOL POOLNAME MIGLIMIT=7
- B. UPDATE STGPOOL POOLNAME MIGLIMIT=1
- C. UPDATE STGPOOL POOLNAME MIGDELAY=7
- D. UPDATE STGPOOL POOLNAME MIGDELAY=1

Answer: C

Explanation:

QUESTION NO: 59

When configuring client-side deduplication, which option can be configured on the client to avoid having to access the server to query extents?

- A. cache=yes
- B. dedupcache yes
- C. enable cache=yes
- D. enablededupcacheyes

Answer: D

Explanation:

QUESTION NO: 60

An IBM Tivoli Storage Manager V6.3 installation has failed very early in the process. The administrator suspects this could be due to the IBM DB2 installation. Where would the administrator find information to confirm this?

- A. db2.outordb2inst.txt
- B. db2setup.log or DB2.log
- C. db2errorlog ortsmdb2.err
- D. db2log.txt or DB2LOG.err

Answer: B

Explanation:

QUESTION NO: 61

An administrator found messages in the IBM Tivoli Storage Manager V6.3 Server activity log regarding a problem with a disk storage pool. The volume is marked as unavailable, and the volume could not be backed up to tape during the last weekend. How can the administrator determine whether there is data in the volume that is not backed up to a copy pool yet?

- A. examine the volhist
- B. q sched copy_volume1
- C. q content volume1 copied=no
- D. q volume volume1 copy=complete

Answer: C

Explanation:

QUESTION NO: 62

How is node replication enabled on a client?

- A. use the define node replication Command
- B. repistate=enabled is added to the node definition
- C. replication=yes is added to the dsm.sys or dsm.opt files
- D. the client node name is added to the replication.opt configuration file

Answer: B

Explanation:

QUESTION NO: 63

What are the mandatory requirements to run the IBM DB2 configuration wizard during the IBM Tivoli Storage Manger V6.3(TSM) installation?

- A. create the database directories, the active log directory, and the archive log directory
- B. create the database directories, the active log director/, and the archive log failover directory
- C. create the database directories, the active log directory, and the log mirror for the active log directory
- D. create the database directories, format the database volumes, and configure the profile for the user ID of the TSM database instance

Answer: A

Explanation:

QUESTION NO: 64

What is the most effective way a company can protect their N-Series and NetApp against data loss?

- A. use Filer Snapshots for long term protection
- B. use full network data management protocol (NDMP) backup weekly and NDMP backup daily
- C. use NDMP backup or incremental backup daily and NDMP SnapMirrorto Tape weekly
- D. use IBM Tivoli Storage Manager backup with the SnapDiff function and additional weekly backups with create new base=yes

Answer: C

Explanation:

QUESTION NO: 65

Which command defines all drives and paths to a virtual tape library in IBM Tivoli Storage Manager V6.3?

- A. define VTL
- B. perform libaction
- C. define library type=vt1
- D. define library devices=auto

Answer: B
