**Vendor:** IBM

**Exam Code:** C2040-407

**Exam Name:** IBM Notes and Domino 9.0 Social Edition  
System Administration B

**Version:** Demo

**Topic 1, Volume A**

**QUESTION NO: 1**

An administrator is not able to access a database on an IBM Domino server as he/she receives the error "You are not authorized to access that database". What can the administrator do to access that database?

- A. Switch IDs to the server ID then try to access the database.
- B. Turn on "Full Access Administration" then try to access the database.
- C. Run maintenance (fixup, compact, updall) against the database in question.
- D. Try to modify the Access Control List of the database by selecting the database in the Files tab of the administrator client.

**Answer: B**

**Explanation:**

**QUESTION NO: 2**

What is a requirement for implementing the IBM Notes password expiration of Notes users?

- A. Notes shared login must be enabled.
- B. Users must have their ID in the Notes ID vault.
- C. Password checking must be enabled on the IBM Domino server.
- D. Password expiration must be configured via a Policy and Person document.

**Answer: C**

**Explanation:**

**QUESTION NO: 3**

What encryption standard has been introduced in IBM Domino 9.0 Social Edition?

- A. Secure Hash Algorithm (SHA-2)
- B. Wired Equivalent Privacy (WEP)
- C. Advanced Encryption Standard (AES)
- D. Federal Information Processing Standard (FIPS)

**Answer: A**

**Explanation:**

**QUESTION NO: 4**

Where is an X.509 certificate, which is used to sign and encrypt SMTP mail, stored?

- A. in the notes.ini
- B. in the IBM Notes ID file
- C. in the Personal Names and Address Book of a user
- D. in the Person document in the IBM Domino Directory

**Answer: B**

**Explanation:**

**QUESTION NO: 5**

What is used to determine the level of access users and servers have to a database?

- A. Policy settings
- B. Server document
- C. Access Control List
- D. Execution Control List

**Answer: C**

**Explanation:**

**QUESTION NO: 6**

Other than the IBM Domino Directory, what happens to documents in databases when the Administration Process performs a Rename Person or a Delete Person request?

- A. Names in all fields are updated.
- B. Nothing. Only the Domino Directory is updated.
- C. Names in Readers and Authors fields are updated where the Administration server has been defined.
- D. Names in Readers and Authors fields are updated where the Administration server has been defined and where the server setting "Modify fields of type Reader or Author" is set.

**Answer: D**

**Explanation:**

**QUESTION NO: 7**

Charles is the ID Vault administrator. What role in the ID Vault database would allow Charles to extract ID files and gain access to users' encrypted data?

- A. [Auditor]
- B. [User Access]
- C. [Password reset]
- D. [Vault Administrator]

**Answer: A**

**Explanation:**

**QUESTION NO: 8**

When would an administrator typically need to adjust the java.policy file?

- A. when an administrator wants to control what JVM version is installed on the client machine
- B. when an administrator wants to control updates to the JVM version on an IBM Domino server
- C. when an administrator needs to adjust the permissions for a Java applet running within a webpage
- D. when an administrator needs to adjust the permissions for a Java agent, process or XPage running Java code

**Answer: A**

**Explanation:**

**QUESTION NO: 9**

Where is username and password information stored following successful session authentication?

- A. browser cache
- B. browser cookie
- C. browser volatile memory
- D. nowhere, as this would be a security risk

**Answer: B**

**Explanation:**

**QUESTION NO: 10**

What is a limitation of implementing IBM Notes Shared Login (NSL)?

- A. NSL cannot be implemented on 64-bit operating systems.
- B. When NSL is enabled, Notes ID vault cannot be implemented.
- C. NSL cannot be implemented through the use of a security policy.
- D. When NSL is enabled, IBM Domino password policies cannot be implemented.

**Answer: D**

**Explanation:**

**QUESTION NO: 11**

The idpcat.nsf will contain which document(s) with the SAML configuration?

- A. IdP assertion document(s)
- B. SAML assertion document(s)
- C. IdP configuration document(s)
- D. SAML configuration document(s)

**Answer: C**

**Explanation:**

**QUESTION NO: 12**

Which minimum access level must a user have in order to view a database ACL?

- A. Editor
- B. Author
- C. Reader
- D. Manager

**Answer: C**

**Explanation:**

**QUESTION NO: 13**

What is the minimum level of access that a CA administrator must have to the IBM Domino Directory?

- A. Editor
- B. Author
- C. Manager
- D. Designer

**Answer: A**

**Explanation:**

**QUESTION NO: 14**

How does the Protected Groups feature work?

- A. The defined group(s) will be protected from receiving mail with attachments.
- B. The defined group(s) cannot be accidentally deleted from the user's local directory.
- C. The defined group(s) cannot be accidentally deleted from the IBM Domino Directory.
- D. The defined group(s) will be protected from mass mailings originating from their home server.

**Answer: C**

**Explanation:**

**QUESTION NO: 15**

What two statements are true about the ID recovery process? (Choose two.)

- A. Can be used to recover user ID files.
- B. Can be used to recover certifier ID files.
- C. Can be used to recover internet passwords.
- D. It removes the need for IDs to be stored on the local user's machine.
- E. ID recovery administrators do not have to be IBM Domino administrators.

**Answer: A,E**

**Explanation:**

**QUESTION NO: 16**

An administrator would like to secure internet passwords in his IBM Domino environment. Which feature can the administrator implement to secure access to internet passwords stored in the Domino Directory?

- A. Use the ACL.
- B. Configure an internet site.
- C. Enforce internet password expiration.
- D. Use the more secure internet password format.

**Answer: D**

**Explanation:**

**QUESTION NO: 17**

What is a credential store?

- A. The credential store is a secure repository where IBM Notes ID files are stored for roaming users.
- B. The credential store is a secure repository for encryption keys necessary for IBM Domino to set up SSO with other applications.
- C. The credential store is a secure repository for encryption keys necessary for Notes client users to be able to send and receive encrypted mail messages.
- D. The credential store is a secure repository for document encryption keys and other tokens necessary for Notes client users to grant access to applications that use the OAuth protocol.

**Answer: D**

**Explanation:**

**QUESTION NO: 18**

How can an administrator allow two IBM Domino organizations to trust one another?

- A. Enable key rollover

- B. Create a cross-certificate
- C. Enable certificate authority
- D. Add the organization into the ACL of the Domino Directory

**Answer: B**

**Explanation:**

**QUESTION NO: 19**

What is the highest level of bit encryption that IBM Domino can generate SSL certificate requests in?

- A. 512
- B. 1,024
- C. 2,048
- D. 4,096

**Answer: C**

**Explanation:**

**QUESTION NO: 20**

When replacing a database design, what does the "Hide formulas and LotusScript" option do?

- A. Hides the design of all elements from the user.
- B. Prevents the user from running agents in debug mode only.
- C. Hides the design of formula and LotusScript agents only from the user.
- D. Removes the source code of all agents and script libraries from the database.

**Answer: A**

**Explanation:**

**QUESTION NO: 21**

What does an IBM Domino administrator use to configure server key rollover?

- A. server's ID properties dialog
- B. Administration tab of the Server document

- C. Keys and Certificates tab of the Security Settings document
- D. Certify New Key Requests view of the Administration Requests database

**Answer: B**

**Explanation:**

**QUESTION NO: 22**

Trisha has created an ID vault on one of the servers that is not the IBM Domino Directory Administration server. Why is she unable to see the Vault document and other vault-related documents in the Domino Directory?

- A. She should refresh the view for the documents to show up immediately.
- B. Those documents will not be added to the Domino Directory until the AdminP task is run manually.
- C. Those documents will not be added to the Domino Directory until they have replicated from the Domino Directory Administration server.
- D. Those documents will not be added to the Domino Directory until they have replicated from the hub server, which does not have to be the Domino Directory Administration server.

**Answer: C**

**Explanation:**

**QUESTION NO: 23**

Jeff is a developer and would like to sign an XPage to run on an IBM Domino server. What is the lowest level of access privilege he needs in order for the XPage to run?

- A. Run restricted LotusScript/Java agents.
- B. Sign agents to run on behalf of someone else.
- C. Sign XPages to run on behalf of the builder of the XPage.
- D. Sign agents or XPages to run on behalf of the invoker of the agent.

**Answer: D**

**Explanation:**

**QUESTION NO: 24**

In the context of certificates and designing certificate structures, can there be multiple Organizations in an IBM Domino domain?

- A. Yes.
- B. No, this can only be done with multiple domains.
- C. Yes, however the Organizations need to be cross-certified with each other.
- D. No, only one Organization can be used. However, multiple Organizational Units may be used with it.

**Answer: A**

**Explanation:**

**QUESTION NO: 25**

Which task is responsible for updating the CA registration authorities in the Certificate document in the IBM Domino Directory?

- A. Monitoring process
- B. Registration process
- C. Administration process
- D. Certificate Authority process

**Answer: C**

**Explanation:**

**QUESTION NO: 26**

How are encrypted messages handled by SMTP mail rules?

- A. SMTP mail rules are unable to process encrypted messages.
- B. SMTP messages cannot be encrypted so this is never an issue.
- C. Encrypted mail is decrypted using information stored in the ID Vault, processed, then re-encrypted.
- D. SMTP mail rules can process encrypted messages, but only using information stored in the unencrypted portion of the message.

**Answer: D**

**Explanation:**

**QUESTION NO: 27**

Ken enabled Message Tracking for the IBM Domino server, but wishes to extend the default period of time that mail tracking data is kept before it is automatically purged by the MTC task. How can Ken configure this?

- A. Issue the tell mtc purge <value> command at the server console.
- B. Issue the tell mtc interval <value> command at the server console.
- C. Set the "Message tracking collection interval" field in the server's Configuration document.
- D. Adjust the purge interval through the Replication Settings for the Mail Tracking Store database.

**Answer: D**

**Explanation:**

**QUESTION NO: 28**

What two tasks can IBM Lotus Protector for Mail Security be used for? (Choose two.)

- A. preventing mail database corruption
- B. encrypting incoming and outgoing email
- C. inspecting incoming email attachments for viruses
- D. locking a mail file for litigation or investigation purposes
- E. preventing sensitive data such as credit card numbers from being sent via email

**Answer: C,E**

**Explanation:**

**QUESTION NO: 29**

Janie is an IBM iNotes user and her mail file has an imported copy of her IBM Notes ID. The administrator has completed a request to change the name on her Notes ID. What will Janie need to do to in order to use the new name?

- A. No end-user interaction is required for the iNotes rename.
- B. Janie must upload a new copy of her Notes ID in order to use the new name.
- C. Janie can either decrypt an encrypted message, or send an encrypted message to complete the rename process.
- D. The next time Janie accesses iNotes she will be prompted to accept the name change in order to use the new name.

**Answer: C**

**Explanation:**

**QUESTION NO: 30**

Which is required in order to use the universal redirect for IBM iNotes users?

- A. Set the TCP/IP port status option to: "Redirect to SSL".
- B. Session-based authentication on the IBM Domino Web Server.
- C. Multiple Servers (SSO) authentication on the Domino Web Server.
- D. Enable the "Require SSL connection" database property for all mail files.

**Answer: B**

**Explanation:**

**QUESTION NO: 31**

What it meant by anti-relay protection?

- A. The methods used to restrict what hosts can connect to an IBM Domino server for replication.
- B. The methods used to restrict what hosts can be accessed via a Domino passthru server.
- C. The methods used to restrict how many external e-mails a user can send through a Domino server.
- D. The methods used to prevent unauthorized use of the Domino SMTP server for external messaging.

**Answer: D**

**Explanation:**

**QUESTION NO: 32**

Which is the minimum version of IBM Notes Traveler that supports High Availability ?

- A. 8.5.3
- B. 8.5.3 UP1
- C. 8.5.3 UP2
- D. 9.0

**Answer: B**

**Explanation:**

**QUESTION NO: 33**

What is the easiest method to disable read return receipts for all incoming emails on a server?

- A. Advise users to disable return receipts in their Mail Preferences.
- B. Read return receipts are part of the SMTP and cannot be disabled.
- C. Disable the "Return receipts" option in the Configuration Settings document of the server.
- D. Enforce the "Disable return receipts" setting in a mail settings policy and apply to all users.

**Answer: C**

**Explanation:**

**QUESTION NO: 34**

David's company wants to append a message disclaimer at the bottom of every outgoing e-mail for legal purposes. What must he do to achieve that?

- A. Create an outgoing SMTP Rule applying the message disclaimer text.
- B. Create a Mail Settings policy document, enter the disclaimer text, and apply to all users.
- C. David must instruct all of his users to modify their e-mail signatures to include the disclaimer text.
- D. Enter the disclaimer text into the Router/SMTP section of the server's Configuration document. Then create a Mail Settings policy document enabling the disclaimer, and apply to all users.

**Answer: B**

**Explanation:**

**QUESTION NO: 35**

For legal reasons, the IBM Domino system administrator has been asked to retain a secure copy of all e-mails transferred in and out of the company. What Domino technology would be best suited to fulfill this request?

- A. SMTP rules
- B. Mail journaling

- C. User mail rules applied via a Mail Settings Policy document
- D. This cannot be done without modifications to the mail template using Domino Designer.

**Answer: B**

**Explanation:**

**QUESTION NO: 36**

Can an administrator assign a policy to a user by editing his person document?

- A. no
- B. yes, only explicit policies
- C. yes, only organizational policies
- D. yes, both organizational and explicit policies

**Answer: B**

**Explanation:**

**QUESTION NO: 37**

Pedro wants to register 130 new users on the IBM Domino server. Juan has recommended that he should create a User Registration policy. Which statement given by Juan is true with regard to creating a User Registration policy?

- A. A User Registration policy will significantly increase the time Pedro spends registering new users.
- B. A User Registration policy limits Pedro to only four common options in order to get a new user registered.
- C. A User Registration policy will not allow Pedro to set common options to be used while registering a new user within Domino.
- D. A User Registration policy will allow Pedro to standardize common options across new users such as internet domain and email address format.

**Answer: D**

**Explanation:**

**QUESTION NO: 38**

What is a requirement to be able to utilize file server roaming on users' machines?

- A. Only the IBM Notes Basic client is supported.
- B. Only the IBM Notes Standard client is supported.
- C. IBM Notes must be installed on a Microsoft Windows operating system.
- D. Administrative rights on the operating system are required to utilize file server roaming.

**Answer: B**

**Explanation:**

**QUESTION NO: 39**

Josh has been asked to rename a user as well as changing the user's Internet address. Which statement is true?

- A. Josh will need to use the Address Change procedure to change only the Internet address after the rename procedure is completed.
- B. When a user is renamed, Josh cannot change the user's Internet address as part of a change to the user's common or alternate name.
- C. When a user is renamed, Josh can change the user's Internet address as part of a change to the user's common or alternate name, but he cannot use this rename procedure to change only the Internet address.
- D. When a user is renamed, not only can Josh change the user's Internet address as part of a change to the user's common or alternate name, but he can also use this rename procedure to change only the Internet address.

**Answer: C**

**Explanation:**

**QUESTION NO: 40**

An administrator needs to add an additional explicit policy to a group of test users. What tool can the administrator use to verify whether or not the settings are being applied correctly?

- A. The administrator can issue the command Show policy on the IBM Domino console.
- B. The administrator can perform a detailed policy synopsis from the Domino Administrator client.
- C. No tool is available but the administrator can wait to see if the settings are applied to the users.
- D. The administrator can Issue the command tell adminp process all, as it will output any errors it might encounter.

**Answer: B**

**Explanation:**

**QUESTION NO: 41**

Which feature allows an administrator to enable desktop settings based on a version and type of operating system?

- A. Dynamic policies
- B. How to apply settings
- C. Dynamic client configuration
- D. Machine-specific policy settings

**Answer: D**

**Explanation:**

**QUESTION NO: 42**

As an administrator, what can be used to easily manage groups in the IBM Domino Directory?

- A. a desktop policy
- B. the Monitoring task
- C. the Administration Process
- D. the Manage Group tool in the Domino Administrator client

**Answer: D**

**Explanation:**

**QUESTION NO: 43**

In which two documents can policies be assigned to a user? (Choose two.)

- A. Policy
- B. Server
- C. Person
- D. Program
- E. Configuration

**Answer: A,C**

**Explanation:**

**QUESTION NO: 44**

The administrator has been asked to move a user's mail file because the user has moved to a different office. When the mail file is moved, the Administration Process first moves it to the new server, then issues a request to delete the old mail file from its original mail server. Which statement defines what must be performed to complete the deletion process?

- A. The administrator must approve this mail file deletion.
- B. The mail file owner must approve the old mail file deletion.
- C. The mail file owner must accept the changes when prompted.
- D. The administrator must notify the mail file owner to accept the deletion.

**Answer: A**

**Explanation:**

**QUESTION NO: 45**

How can the multi-user migration assistant be configured?

- A. modifying the notes.ini
- B. applying a desktop policy
- C. modifying the Windows registry keys
- D. modifying the MUMigrationAssistant.ini

**Answer: D**

**Explanation:**

**QUESTION NO: 46**

Paula, the IBM Domino administrator, registers new users in IBM Notes and Active Directory at the same time. All defaults are used, and the entire registration queue is processed. When these users are created, random passwords are generated and placed in which database?

- A. names.nsf
- B. adminp.nsf
- C. ntsync45.nsf
- D. adsync45.nsf

**Answer: C**

**Explanation:**

**QUESTION NO: 47**

What is an IBM Domino Off-Line Services (DOLS) application called?

- A. Replica
- B. Syndicator
- C. Subscriber
- D. Subscription

**Answer: D**

**Explanation:**

**QUESTION NO: 48**

Carol made a number of modifications to a Mail policy settings document. She observed that the assigned users are not receiving any of the modified policy changes. What can Carol do to push the new Mail policy settings to the assigned users?

- A. Increase the precedence value for the policy.
- B. Notify each user that they need to restart their IBM Notes client.
- C. Issue the server console command: tell adminp process mailpolicy
- D. Notify users to press Ctrl + F5 to re-authenticate with their home/mail server.

**Answer: C**

**Explanation:**

**QUESTION NO: 49**

Adrian is an administrator of an IBM Domino server and has setup IBM Notes Smart Upgrade. How can he monitor who has upgraded along with any failures?

- A. by using the event logs in the main server log
- B. by using the Smart Upgrade Event Log application
- C. by using the logs in the Smart Upgrade application
- D. by using the Smart Upgrade Tracking Reports application

**Answer: D**

**Explanation:**

**QUESTION NO: 50**

Following the recertifying of a user, which server process handles the renaming of entries of Readers and Authors fields in documents?

- A. amgr
- B. adminp
- C. update
- D. router

**Answer: B**

**Explanation:**

**QUESTION NO: 51**

John created a dynamic policy that will be applied to a group of top executives in the organization. How can John ensure that settings from other assigned dynamic policies do not conflict with this policy?

- A. Select the "Enforce in child policies" option for the pertinent fields.
- B. Deselect the "Inherit from parent policy" option for the pertinent fields.
- C. Increase the precedence for this dynamic policy to a value higher than any other.
- D. Delete the other assigned dynamic policies from each member's Person document.

**Answer: C**

**Explanation:**

**QUESTION NO: 52**

Cindy would like to create an additional policy for laptop users, but this policy will only have a few differences from the parent policy. In what way could she do this that would ensure she would only have to make a few changes?

- A. She can create a new policy with all new policy and settings documents.
- B. She can create a new policy with all new policy documents, and copy and paste values from a

parent setting.

**C.** She can use policy inheritance to inherit values from a parent policy and change only the items she wishes in the child.

**D.** She can create a new policy with a new policy document, reuse existing settings document, and create new settings for changes.

**Answer: C**

**Explanation:**

#### **QUESTION NO: 53**

Which two processes are detected by the IBM Notes Install Cleanup Executable tool? (Choose two.)

**A.** nfixup.exe

**B.** notes2.exe

**C.** soffice.bin

**D.** nreplica.exe

**E.** ncompact.exe

**Answer: B,C**

**Explanation:**

#### **QUESTION NO: 54**

Josh has been asked to add a server to a cluster. What rights must he have to perform that task?

**A.** Editor access to the IBM Domino Directory, as well as Manager access to the Administration Requests database.

**B.** Manager access to the Domino Directory, as well as Manager access to the Administration Requests database.

**C.** Author access, Delete Documents rights, ServerModifier and ServerCreator roles in the Domino Directory, as well as Author access with

Create documents rights in the Administration Requests database.

**D.** Contributor access, Create Documents rights, ServerModifier and ServerCreator roles in the Domino Directory, as well as Author access with

Create documents rights in the Administration Requests database.

**Answer: C**
