Vendor: IBM

Exam Code: C2140-136

Exam Name: Rational Application Developer v7

Q&As: 60

QUESTION 1

Which view best displays the list of all callers and callers of a selected method?

- A. Call Hierarchy
- B. Hierarchy
- C. Outline
- D. Package Explorer

Correct Answer: A

QUESTION 2

When creating a session bean, the default selection for the session bean is to create a remote client view instead of a local client view. This is because:

- A. Even though a local client view is available, it is a best practice to never use a local client view in a session bean.
- B. Session beans are normally used to implement facades, and as such, require remote interfaces as opposed to local interfaces.
- C. A remote client view is easier to use.
- D. Local client view for session beans has been deprecated.

Correct Answer: B

QUESTION 3

A developer has closed a view in the Java perspective in the workbench. What can the developer select to recover the original Java perspective layout?

- A. Window > Delete Perspective
- B. Workbench > Use Defaults
- C. Window > Reset Perspective
- D. File > Recover Defaults

Correct Answer: C

QUESTION 4

What can a developer manage using Rational Application Developer?

- A. a single workspace per workbench
- B. multiple workspaces per workbench by switching between workspaces
- C. multiple workspaces per workbench by organizing them as views
- D. multiple workspaces per workbench with additional licenses

Correct Answer: B

QUESTION 5
