- B. Transfer of depreciations from Asset Accounting
- C. Transfer of personnel cost from HR
- D. Plan distribution
- E. Activity input planning

Correct Answer: AE

QUESTION 9

A customer wants to allocate internal and external costs, based on statistical key figure values, to the receivers. Which method do you choose?

- A. Assessment
- B. Overhead calculation
- C. Distribution
- D. Settlement

Correct Answer: A

QUESTION 10

What does the planner profile in cost center accounting determine?

- A. The available planning layouts.
- B. The required planning sequence.
- C. The available planning level.
- D. The available planning methods (for example, top-down, forecast).

Correct Answer: A

QUESTION 11

Which master data is required for a direct activity allocation? Note: There are 3 correct answers to this question.

- A. Activity type
- B. Cost center
- C. Allocation cycle
- D. Activity price
- E. Secondary cost element

Correct Answer: ABE

QUESTION 12

In January, you posted a headcount of 10 employees as an actual statistical key figure on a cost center. The key figure is defined as fixed value. In July, the headcount is reduced to 8 employees for the rest of the year. What headcount do you have to post?

- A. -2 in each period July to December.
- B. -2 in period July.
- C. 8 in each period July to December.
- D. 8 in period July.

Correct Answer: D

QUESTION 13

Which data do you need to set up an accrual calculation with the percentage method? Note: There are 2 correct answers to this question.

- A. Accrual settlement rules with percentage method.
- B. Secondary cost element (category 31) as accrual cost element.
- C. Primary cost element (category 3) as accrual cost element.
- D. Accrual allocation cycle with sender receiver segments.
- E. Cost center or internal order (order category 2) as credit object.

Correct Answer: CE

QUESTION 14

A company wants to prevent postings of more than 5000 EUR on cost centers by generating an error message. What do you recommend?

- A. Activating and using availability control for cost centers.
- B. Creating a substitution rule in the IMG.
- C. Creating a lock amount on the control tab in the cost center master data.
- D. Creating a validation rule in the IMG.

Correct Answer: D

QUESTION 15

A customer wants to perform cost center planning to reflect different expectations for the future. How can the customer create different plans in parallel?

- A. Use different versions.
- B. Use different costing variants.
- C. Use different planning areas.
- D. Use different valuation areas.

Correct Answer: A

QUESTION 16

A certain cost element has conflicting cost center assignments in the Default Account Assignment field (cost element master data) and in the Automatic Account Assignment table (IMG). What happens when a document is posted with this cost element?

- A. The Automatic Account Assignment (IMG) has a higher priority.
- B. An error message is displayed.
- C. The system prompts you in a dialog box.
- D. The Default Account Assignment (cost element master data) has a higher priority.

Correct Answer: A

QUESTION 17

A customer allocates a variety of cost elements from many cost centers to others by distribution cycles. The customer complains about the long duration and runtime. What do you recommend to shorten the runtime? Note: There are 2 correct answers to this question.

- A. Use cycle run groups for parallel processing.
- B. Use iteration within the cycles.
- C. Use assessment instead of distribution.
- D. Use an allocation structure within the distribution cycles.

Correct Answer: AC

QUESTION 18

Which of the following allocation methods in cost center accounting use secondary cost elements? Note: There are 3 correct answers to this question.

- A. Activity allocation
- B. Periodic reposting
- C. Distribution
- D. Overhead surcharges
- E. Assessment

Correct Answer: ADE

QUESTION 19

What do cost center categories allow you to do? Note: There are 2 correct answers to this question.

- A. Determine the use of cost centers in cost allocations.
- B. Provide default values for new cost centers (for example, block indicators).
- C. Restrict cost center planning to specific cost elements.
- D. Restrict the assignment of specific activity types.
- E. Determine the usage of cost centers for certain methods of activity allocation.

Correct Answer: BD

QUESTION 20

How is Work in Process (WIP) calculated on a product cost collector?

- A. Based on the standard cost estimate, independent of the valuation variant settings.
- B. Based on the target cost, depending on the order type settings.
- C. Based on actual cost, depending on the order status.
- D. Based on target cost, depending on the valuation variant settings.

Correct Answer: D

QUESTION 21

How can you use resource related billing for sales order items?

- A. Assign production orders with BOMs and routings.

- B. Use a Requirement class with an indicator set for resource related billing.
- C. Use Easy Cost Planning and Execution Services.
- D. Assign Dynamic Item Processor (DIP) profiles.

Correct Answer: D

QUESTION 22

A customer asks you to explain the category price variances received on production orders. What could be the reason for price variances? Note: There are 2 correct answers to this question.

- A. The activity types were consumed from different cost centers.
- B. The master data of the consumed materials is V price indicated.
- C. The valuation variants of the cost estimate and the production order are different.
- D. The respective routing has changed.

Correct Answer: BC

QUESTION 23

When do you calculate variances for a production order with order controlling?

- A. At the end of each period, independent of the order status.
- B. After the final delivery of the production order.
- C. After the first partial delivery of the production order.
- D. After the final confirmation for the last operation.

Correct Answer: B

QUESTION 24

A customer wants you to explain the results of the preliminary costing of a production order. How are the results determined?

- A. The actual quantities are valued with plan values.
- B. The costs are determined by the cost estimate of the reference order.
- C. The standard cost estimate is copied from the material master and adjusted by the order quantity.
- D. The quantity structure in the production order is valued by the costing variant settings.

Correct Answer: D

QUESTION 25

What is the prerequisite for sales order controlling?

- A. The sales order item must have a cost object assigned by a requirement class.
- B. The cost object of the sales order item must be created manually in the sales order.
- C. A product cost collector must be assigned to the sales order item.
- D. A valued customer order special stock must be assigned to the sales order item.

Correct Answer: A

QUESTION 26

A customer wants to allocate overhead costs to a production order. How can the customer achieve that? Note: There are 3 correct answers to this question.

- A. Use routings and work centers.
- B. Define an assessment cycle.
- C. Use a template.
- D. Use a costing sheet.
- E. Use indirect activity allocation.
