Vendor: HP

Exam Code: HP2-N43

Exam Name: HP Performance Center v.11.x Software

Version: Demo

QUESTION 1

What is a main difference between Performance Center and LoadRunner?

- A. It allows management of all test users, resources, and assets in a centralized way.
- B. It allows scheduling a delayed test start, even if the test operator is away.
- C. It allows dynamic distribution of test load to different Load Generators
- D. It allows concurrent load testing by different members of the team, provided more than one controller is licensed

Correct Answer: A

QUESTION 2

Which action can you perform from the Load Test Run page?

- A. Identify the location for the load test results.
- B. View online monitor graphs.
- C. Establish the correct ramp-up rate for each Vuser group.
- D. Enable diagnostics for a limited percentage of running Vusers.

Correct Answer: D

QUESTION 3

Which components can you check by using the System Health of ALM? (Select three.)

- A. All client-side standalone installations, like VuGen or Analysis
- B. ALM database
- C. One or more Performance Center Hosts
- D. MListener Installations
- E. One or more Performance Center Servers
- F. ALM platform
- G. clients that access the ALM user site

Correct Answer: BEF

QUESTION 4

What should you do when reserving timeslots? (Select two.)

- A. Always create ad-hoc timeslots
- B. Add all hosts with any status to a timeslot.
- C. Add monitor profile.
- D. Add at least 15 minutes to collate results in your timeslot.

Correct Answer: D

QUESTION 5

When is monitoring data collected for the analysis?

- A. At the end of the load test
- B. As designed in Tools > Options
- C. As designed in Controller Options
- D. As designed in Timeslot Options

Correct Answer: C

QUESTION 6

Which services are required to be up and running on all PC servers and hosts before you install Performance Center?

- A. IPSEC Services, RPC, and NTLM Security support provider
- B. IPSEC Services, Distributed Transaction Coordinator, and RPC
- C. NTLM Security support provider Task Manager, and RPC
- D. Remote Registry Service, IPSEC Services, and Distributed Transaction Coordinator

Correct Answer: A

QUESTION 7

What information is required to add a Performance Center Server in the Lab Management?

- A. Proxy port
- B. Internal URL
- C. Local machine key
- D. Password

Correct Answer: D

QUESTION 8

What is System Health Orphan Run Task?

- A. A manual task that runs on demand and identifies orphan test runs during the active timeslot.
- B. A scheduled task that runs, by default, four times per hour and identifies orphan test runs during the active timeslot.
- C. A scheduled task that runs, by default, one time per minute and identifies orphan test runs during the active timeslot.
- D. A scheduled task that runs, by default, four times per hour and identifies orphan test runs during and outside the active timeslot.

Correct Answer: B

QUESTION 9

Which step or piece of information is mandatory when creating a project? (Select two)

- A. Project domain
- B. Set a Vuser limit.
- C. Create a single Project Administrator.
- D. Assign more than one Project Administrator.
- E. Project name

Correct Answer: AE

QUESTION 10

To create a monitor profile, which steps are necessary? (Select three)

- A. Install or configure monitoring components on the server machine
- B. Configure Proxy Settings.
- C. Configure SiteScope.
- D. Add Monitors to the profile.
- E. Configure DNS
- F. Create Test Resources from the Test Resources module.

Correct Answer: ADF

QUESTION 11

How is secure communication accomplished between the ALM platform and the Performance Center components?

- A. Via encryption, based on a predetermined passphrase
- B. Via a dedicated Virtual Private Network
- C. Via encryption, based on the user's own password
- D. Via a 24-digit password

Correct Answer: A

QUESTION 12

Aside from the required pre-installation software, which type of software does a Performance Center machine need?

- A. Internet Information Services (IIS)
- B. Strawberry Perl 5.10.1
- C. VuGen Standalone software
- D. VuGen and Analysis Standalone software

Correct Answer: A

QUESTION 13

Which tool enables you to set the initial security settings locally on each host?

- A. Site Administration
- B. Host Security Manager
- C. Lab Management
- D. Host Security Setup utility

Correct Answer: D

QUESTION 14

Which step is part of the load test launch process?

- A. Collate temporary results from Load Generators.
- B. Reserve Timeslots
- C. Analyze the Application Under Test.
- D. Identify top time transactions.

Correct Answer: B

QUESTION 15

What is a general run time setting for all protocols?

- A. Proxy
- B. Speed simulation
- C. Pacing
- D. Browser settings

Correct Answer: D

QUESTION 16

Which information can be found in PC usage reports? (Select two.)

- A. breakdown of virtual user type utilized in the load tests
- B. resource usage on the PC host machines during test runs
- C. number of virtual users utilized by each project

D. working hours by each PC user g] overall license usage

Correct Answer: B

QUESTION 17

Which steps are required to set the license key in Performance Center? (Select two.)

- A. Add License Key.
- B. Update License Host location.
- C. Log in to the Lab Management.
- D. Log in to the Performance Center Server.
- E. Log in to the Performance Center Host.

Correct Answer: AC

QUESTION 18

What is the tuning recommendation for improving Load-Generator performance on Linux?

- A. Increase file descriptors.
- B. Decrease file descriptors.
- C. Decrease process entries.
- D. Reduce swap space.

Correct Answer: A

QUESTION 19

What does the feature implemented in the Patch Management User Interface enable?

- A. Any user with the right permissions to upload a patch to the system and then install the patch on the appropriate host or server
- B. Any user with access to the Lab Management section to upload a patch, and any administrator to install it on the appropriate host or server
- C. Any administrator to upload a patch to the system and to then let any user install the patch on the appropriate host or server
- D. Any administrator to check the HP official support website, alerting the support staff of new patch releases

Correct Answer: C

QUESTION 20

Why can the "Initialize Vuser before ramp up" setting be beneficial?

- A. It ensures network connectivity between the Controller and hosts.
- B. It ramps-up to the optimum amount of Vusers before the load test runs.
- C. It reduces CPU utilization and gets realistic load test results.
- D. It executes any appropriate login code in the Vuser Action section.

Correct Answer: A

QUESTION 21

Which model describes Test Resources usage by LoadRunner and Performance Center?

- A. A LoadRunner Controller Scenario and a Performance Center Test are not interchangeable.
- B. A LoadRunner Controller can open a Performance Center Test, but not vice versa.
- C. A LoadRunner Controller Scenario and a Performance Center Test are interchangeable.
- D. A LoadRunner Controller can open a Performance Center Test Set, but not vice versa.

Correct Answer: A

QUESTION 22

Where can a Performance Center user create Service Level Agreement (SLA) thresholds?

- A. Results viewed in Analysis
- B. Reports in Excel
- C. Test Designer and Analysis
- D. Test Designer in Test Plan
- E. Test Set options in Test Lab

Correct Answer: E

QUESTION 23

Which step is recommended as part of the ALM patch upgrade process on hosts?

- A. Upload project scripts.
- B. Rename host.
- C. Delete test results.
- D. Reserve hosts in maintenance timeslots.

Correct Answer: D

QUESTION 24

Where can you check permissions for a user group in Performance Center?

- A. Site Administration module
- B. Lab Management module
- C. User Site module
- D. Directly in the database

Correct Answer: A

QUESTION 25

In order to perform an analysis of run results, what must you first do with them?

- A. Collect
- B. Collate
- C. Mediate
- D. Transactionalize

Correct Answer: B

QUESTION 26

Which template is valid for Trend Reports?

- A. Trend by BSM data Template
- B. Trend by Monitor Measurements Template
- C. SiteScope Monitors Template
- D. Trend by Quality Attributes Template

Correct Answer: D

QUESTION 27

What does Performance Center Test use Topology to do?

- A. Restrict user access to AUT hosts
- B. Upload files to Topology servers

- C. Manage an inventory of AUT hosts
- D. Define performance monitors by integrating with HP SiteScope

Correct Answer: C

QUESTION 28

What is required to install Performance Center Server and Hosts?

- A. A configured DNS server
- B. Security passphrases set up on all machines
- C. Full administrative privileges on the machines
- D. IIS configured on all machines

Correct Answer: D

QUESTION 29

What does PAL stand for?

- A. Performance Analysis Lifecycle
- B. Performance Application Lifecycle
- C. Personalized Application Lifecycle
- D. Production Application Lifecycle

Correct Answer: B

QUESTION 30

What is run status on the Load Test page if the timeslot setting of Collate Only was used for post-run analysis settings?

- A. No Run
- B. Failed Creating Analysis Data
- C. Finished
- D. Before Creating Analysis Data

Correct Answer: C

QUESTION 31

After Performance Center is installed, the administrator should perform a progression of steps to verify that the installation was successful. Which step is correct to include in this verification process?

- A. Create a new project in Site Administration and select the ALM Lab Extension.
- B. Enable the Check ALM Server in the System Health Check box in Lab Management.
- C. Log into Site Administration and verify that the PC_ENABLED Site Configuration parameter is set to.
- D. Import the ALM Upgrade Verification Project and execute all tests successfully.

Correct Answer: B

QUESTION 32

What is an example of a service level agreement (SLA) defined in the transaction volume metrics?

- A. Expected database thread count
- B. Server operating system patch levels
- C. Maximum web server memory usage
- D. peak hour transaction count

Correct Answer: D
