Vendor: Microsoft

Exam Code: MB6-819

Exam Name: AX 2009 Development Introduction

Version: Demo

QUESTION 1

What is IntelliMorph?

- A. IntelliMorph is the Integrated Development Environment in Microsoft Dynamics AX.
- B. IntelliMorph is the tool you use to create a new label file.
- C. IntelliMorph is used when data from more than one table needs to be shown on a form or a report.
- D. IntelliMorph is the automatic layout generation of Forms, Reports and Menus.

Correct Answer: D

QUESTION 2

What is the most significant reason behind the ability to easily scale the number of concurrent users in Microsoft Dynamics AX2009?

- A. Normalized database
- B. Configuration Key system
- C. Layer structure
- D. AOS technology

Correct Answer: D

QUESTION 3

What will occur in Microsoft Dynamics AX2009 when a form is imported to the VAR layer, which already has modifications made to it in the USR layer?

- A. The USR layer modifications will continue to be used.
- B. The USR layer modifications will be deleted.
- C. The USR layer will be overridden by the VAR layer.
- D. The VAR layer modifications will be deleted.

Correct Answer: A

QUESTION 4

A customer needs to search for vendor data across several tables. How can this be done?

- A. Set up the Data Crawler and use Global Search.
- B. Use the Global Query function
- C. Use the "Filter By Selection" function.
- D. Use the "Filter by Field" function

Correct Answer: A

QUESTION 5

How are labels stored in Microsoft Dynamics AX?

- A. In the ax*.ali files on the client
- B. In the ax*.ali files on the AOS
- C. In the ax*.ald files on the client
- D. In the ax*.ald files on the application server.

Correct Answer: D

QUESTION 6

If you want to delete the entire USR-layer from Microsoft Dynamics AX2009, what files do you delete from the application folder?

- A. All Axusr*. * files and the axapd.aoi file.
- B. All *.aod files.
- C. The axaod.usr file and the axapd.aoi file.
- D. The Axusr.aoi and axusr.aot files.

Correct Answer: A

QUESTION 7

How should you change the label of an existing system field?

- A. By modifying the existing label in the SYS label file.
- B. By copying the object into a higher layer and then creating a new label in the SYP layer file.
- C. By creating a new label in a new label file.
- D. It cannot be done.

Correct Answer: C

QUESTION 8

What is the advantage of using indexes?

- A. Indexes speed up inserts.
- B. Indexes speed up selects.
- C. Indexes use less data space in the database.
- D. Indexes use less files in the database.

Correct Answer: B

QUESTION 9

Where can you drag and drop an extended data type to?

- A. To a form design
- B. To a table.
- C. To a class.
- D. To a form data source

Correct Answer: B

QUESTION 10

How can the StringSize property of a new extended data type, which is inherited from custAccount, be changed?

- A. The StringSize of extended data types CANNOT be changed.
- B. By changing the StringSize on custAccount
- C. By changing the StringSize on the new extended data type.
- D. By changing the StringSize on the top-level parent of the custAccount

Correct Answer: D

QUESTION 11

What is the standard ArrayLength value of a new extended data type?

- A. 0
- B. 1
- C. 2
- D. 4

Correct Answer: B

QUESTION 12

How can you make sure the end user cannot delete a record in one table if there are related records in another table?

- A. By creating the relation in the Delete method on the parent table.
- B. By creating a Cascade delete action on the related table.
- C. By creating a new method on both tables.
- D. By creating a Restricted delete action on the parent table.

Correct Answer: D

QUESTION 13

When is it appropriate to define table relations directly on tables instead of using the extended data types?

- A. When one field in a table relates to one field in another table.
- B. When multiple fields in a table define one relation to multiple fields in another table.
- C. When one field in a table relates to multiple fields in another table.
- D. Never; relations should always be set up on the extended data types.

Correct Answer: B

QUESTION 14

Which statement is true about Table Maps?

- A. Table Maps join tables that are similar in structure so they can be viewed in the same grid.
- B. Table Maps reduce coding by mapping tables that are similar in structure.
- C. Table Maps improve performance
- D. Table Maps are synchronized with the SQL database

Correct Answer: B

QUESTION 15

Which elements are part of the data dictionary? Choose the three that apply.

- A. Perspectives
- B. Queries
- C. Extended Data Types
- D. Views

Correct Answer: ACD

QUESTION 16

Isaac, the systems developer, is working on a new table that contains information about employees who have used company cars. He wants to add a relation to EmpITable and it should only show employees who have the status employee. Which relation is the best one to use?

- A. Normal
- B. Special
- C. Field fixed
- D. Related field fixed

Correct Answer: D

QUESTION 17

What data types can be used in a conditioned relation on a table?

- A. Strings

- B. Enums
- C. Dates
- D. Reals

Correct Answer: B

QUESTION 18

What property is NOT inherited when extending a data type?

- A. StringSize
- B. Relations
- C. Array elements
- D. Label

Correct Answer: C

QUESTION 19

Which controls are needed to create a tabbed form? Choose the two that apply.

- A. Tab
- B. TabPage
- C. TabControl
- D. TabOverview

Correct Answer: AB

QUESTION 20

Where is the layout of a form defined?

- A. In the Properties on the Form node.
- B. In the AutoDesign node of the Form
- C. In the Design node of the Form.
- D. In the Global Form Design.

Correct Answer: C

QUESTION 21

What are Action Menu Items used for?

- A. An Action Menu Items is used to force the end user to actively confirm a request.
- B. Action Menu Items call multiple Menu Items at the same time.
- C. Action Menu Items are used to install Service packs.
- D. The Action Menu Item is a link to execute a specified class, query or form.

Correct Answer: D

QUESTION 22

What can be an advantage when executing an object through a Menu Item?

- A. The check of security rights.
- B. The end user will be warned if the object is in use by another end user.
- C. The object can then be executed directly from code.
- D. The Menu Item performs a runtime error detection on the object.

Correct Answer: A

QUESTION 23

Setting the LinkType property on a form data source to Delayed indicates:

- A. A pause is inserted before linked child data sources are updated.
- B. A pause is inserted before the parent data source is updated.
- C. A pause is inserted before the form opens.
- D. The JoinSource is not active.

Correct Answer: A

QUESTION 24

Linking of data between data sources in a form is controlled by:

- A. Table Relations.
- B. JoinSource properties on the data sources.
- C. Dragging the Secondary Table to the Primary table in the data source node.
- D. The Method TableLinks.

Correct Answer: B

QUESTION 25

Which of the following are possible values for the LinkType property on a data source in a form? Choose the two that apply.

- A. DelayedExists
- B. InnerJoin
- C. Passive
- D. NotExists

Correct Answer: BC

QUESTION 26

What is the Object property on a Display Menu Item used for?

- A. To specify the Form that is to be opened
- B. To specify the Report that is to be opened
- C. To specify the Data Source of the Report that is to be opened
- D. To specify the Data Source of the Form that is to be opened

Correct Answer: A

QUESTION 27

How can you create a project that is visible to the other developers working on the same application?

- A. Open the AOT and create a project in the Public folder under the Project node.
- B. Click the Project button and create a project in the Shared folder.
- C. Create a project, right-click on the project and select Add-Ins > Public
- D. Create the project and set the property to Shared.

Correct Answer: B

QUESTION 28

Which of the following statements is true about development projects? Choose the two that apply.

- A. An element in a project is locked and cannot be edited by other users
- B. Modifications made to an element in a project need to be synchronized with the AOT to make the modifications visible to other users
- C. Projects are only used to group elements that are modified for a specific development task

D. Projects are layer specific.

Correct Answer: CD

QUESTION 29

What is a Menu Reference?

- A. A reference to a Menu
- B. A reference to a Form
- C. A reference to the Main Menu.
- D. A reference to related Tables.

Correct Answer: A

QUESTION 30

Which of the following is the correct order in which the listed report sections are printed, from top to bottom?

- A. Prolog, PageHeader, Header, SectionGroup, Footer, Epilog
- B. Header, Prolog, SectionGroup, Epilog, PageFooter, Footer
- C. Header, PageHeader, SectionGroup, PageFooter, Footer
- D. Prolog, Epilog, Header, SectionGroup, Footer

Correct Answer: A

QUESTION 31

Which of the following are ways to add a new string control for a field on the CustTable datasource to a report design? Choose the three that apply.

- A. Open the Visual Report Designer. Right-click in a section and select New > Field from CustTable. Drag a field onto the section from the list that is displayed.
- B. Open the Visual Report Designer. Right-click in a section and select New > String. Set Datasource property on new control to CustTable.
- C. Drag the field from the CustTable node in the AOT to a report section
- D. Right-click on a report section in the AOT. Select New Control > Field from CustTable. Drag a field onto the section from the list that is displayed.

Correct Answer: ABD

QUESTION 32

Which of the following is TRUE about using the Generated Design option on reports? Choose the two that apply.

- A. A Generated Design is not affected by the structure of the underlying query.
- B. A Generated Design is affected by the structure of the underlying query.
- C. ProgrammableSections are not available in Generated Designs. SectionGroup sections can be used instead.
- D. A Generated Design will use the Template only when first generated.

Correct Answer: AD

QUESTION 33

Which of the following describes the LabelTabLeader property?

- A. It inserts a series of dots between the label and the field value.
- B. It inserts a tab between the label and the field value.
- C. It defines the number of tabs between the label and the field value.
- D. It defines a label on a tab.
