

Vendor: IBM

Exam Code: P2060-001

Exam Name: IBM B2B Integration Technical Mastery
Test v1

Version: Demo

Question No : 1

Which of the following is NOT a key frustration of the business integration environment?

- A. Reliance on multiple integration tools.
- B. Integration capability based on older technology.
- C. Integration tools do not handle EDI/B2B/SOA.
- D. Integration tools do not provide visibility across the supply chain.

Answer: D

Question No : 2

Which of the following cannot be adjusted using the Performance Tuning wizard?

- A. Number of available CPU's.
- B. Allocated physical memory.
- C. Database pool connections.
- D. Priority levels of work queues.
- E. JVM memory and system cache settings.

Answer: D

Question No : 3

Which of the following is NOT a key business benefit of deploying Sterling B2B Integrator?

- A. Reduced administration costs.
- B. Enable more of your trading partners.
- C. Reduced man-power required.
- D. Integrated security management.

Answer: D

Question No : 4

Which of the following is NOT an approach typically used for enabling smaller trading

partners?

- A. SMTP e-mail with attachments.
- B. Web extensions to create custom web portals for data entry by small partners.
- C. Fully automated EDI.
- D. None of the above.

Answer: C

Question No : 5

What is the function of the perimeter server?

- A. Enables business processes to be scheduled.
- B. Provides a session break for communications in the De-Militarized Zone (DMZ).
- C. Stores common "state" data which can be accessed by all nodes in the cluster.
- D. All of the above.

Answer: B

Question No : 6

What are the key challenges around managing smaller trading partners?

- A. Smaller partners generate the smallest volume of messages.
- B. Smaller partners will have non-standard ERP systems.
- C. Smaller partners typically require manual processes which are more costly and time-consuming.
- D. Smaller partners EDI systems will only accept the latest EDI / B2B standards.

Answer: C

Question No : 7

Which of these Application Services are provided with Sterling B2B Integrator?

- A. Web Services, Web Extensions, Java SDK and Managed File Transfer.

-
- B. Document standards, routing, integration adapters, transformation and mapping, community services and communication services.
 - C. Event management, presentation services, dashboard services, auditing & reporting.
 - D. B2B orchestration, workflow, process modeling, process templates.

Answer: A

Question No : 8

Which of the following is NOT a factor hindering multi-enterprise integration efforts?

- A. Customers and suppliers expect higher levels of service from their call centers
- B. Increasingly complex and time sensitive supply chains
- C. Customers and suppliers requiring more B2B activities
- D. Customers expect improved B2B capabilities

Answer: A

Question No : 9

Which of the following are architectural components of Sterling B2B Integrator?

- A. Services or Adapters that perform various actions.
- B. Process engine which is the main execution mechanism.
- C. Work queues with a dedicated thread pool.
- D. All of the above.

Answer: D

Question No : 10

Which of these technology approaches will NOT be likely to address the challenges of multi-enterprise integration?

- A. Improved monitoring of customer transactions.
- B. More granular auditing of transactions.
- C. Insistence on only using a single B2B protocol and standard.

-
- D. Consolidation of multiple point solutions to a single platform.
 - E. All of the above.

Answer: C

Question No : 11

Which of these Process Management Services are provided with Sterling B2BIntegrator?

- A. B2B orchestration, workflow, process modeling, process templates.
- B. Document standards, routing, integration adapters, transformation and mapping, community services and communication services.
- C. Event management, presentation services, dashboard services, auditing & reporting.
- D. Web Services, Web Extensions, Java SDK and Managed File Transfer.

Answer: A

Question No : 12

Which of the following is NOT a recommended deployment model for Sterling B2B Integrator?

- A. Active/Active clustering with an external database.
- B. Active/Active clustering with a local database.
- C. Active/Active clustering with database replication at a remote site.
- D. Warm standby at a remote site.

Answer: B

Question No : 13

Which of these does NOT enable scalability?

- A. Multi-queue design.
- B. Active-active clustering across multiple server nodes .
- C. Support for multiple operating systems and databases.
- D. Common state information stored in the database.
