**Q&As:** Demo

#### QUESTION 1

Gary is the project manager of his organization. He is managing a project that is similar to a project his organization completed recently. Gary has decided that he will use the information from the past project to help him and the project team to identify the risks that may be present in the project. Management agrees that this checklist approach is ideal and will save time in the project. Which of the following statement is most accurate about the limitations of the checklist analysis approach for Gary?

- A. The checklist analysis approach is fast but it is impossible to build an exhaustive checklist.
- B. The checklist analysis approach saves time, but can cost more.
- C. The checklist analysis approach only uses qualitative analysis.
- D. The checklist is also known as top down risk assessment.

**Correct Answer:** A

#### QUESTION 2

You are the project manager of the GGG project. You have completed the risk identification process for the initial phases of your project. As you begin to document the risk events in the risk register what additional information can you associate with the identified risk events?

- A. Risk potential responses
- B. Risk schedule
- C. Risk owner
- D. Risk cost

**Correct Answer:** A

#### QUESTION 3

You are the project manager for the TTR project. You are in the process of gathering information for risk identification. You ask experts to participate in the process through their emails for maintaining anonymity. You collect the responses, summarize them, and are then re-circulated to the experts for further comment. Which of the following techniques are you using for risk identification?

- A. Delphi
- B. Expert judgment
- C. SWOT analysis
- D. Brainstorming

**Correct Answer:** A

#### QUESTION 4

Ben is the project manager of the CMH Project for his organization. He has identified a risk that has a low probability of happening, but the impact of the risk event could save the project and the organization with a significant amount of capital. Ben assigns Laura to the risk event and instructs her to research the time, cost, and method to improve the probability of the positive risk event. Ben then communicates the risk event and response to management. What risk response has been used here?

- A. Sharing
- B. Transference
- C. Enhance
- D. Exploit

**Correct Answer:** C

#### QUESTION 5

Your project uses a piece of equipment that if the temperature of the machine goes above 450 degree Fahrenheit the machine will overheat and have to be shut down for 48 hours. Should this machine overheat even once it will delay the project's end date. You work with your project to create a response

that should the temperature of the machine reach 430, the machine will be paused for at least an hour to cool it down. The temperature of 430 is called what?

- A. Risk response
- B. Risk event
- C. Risk trigger
- D. Risk identification

**Correct Answer: C**

#### **QUESTION 6**

You are the project manager of the GHQ project for your company. You are working with your project team to prepare for the qualitative risk analysis process. Mary, a project team member, does not understand why you need to complete qualitative risks analysis. You explain to Mary that qualitative risks analysis helps you determine which risks needs additional analysis. There are also some other benefits that qualitative risks analysis can do for the project. Which one of the following is NOT an accomplishment of the qualitative risk analysis process?

- A. Corresponding impact on project objectives
- B. Time frame for a risk response
- C. Prioritization of identified risk events based on probability and impact
- D. Cost of the risk impact if the risk event occurs

**Correct Answer: D**

#### **QUESTION 7**

When does the Identify Risks process take place in a project?

- A. At the Planning stage.
- B. Throughout the project life-cycle.
- C. At the Initiating stage.
- D. At the Executing stage.

**Correct Answer: B**

#### **QUESTION 8**

Sam is the project manager of a construction project in south Florida. This area of the United States is prone to hurricanes during certain parts of the year. As part of the project plan Sam and the project team acknowledge the possibility of hurricanes and the damage the hurricane could have on the project's deliverables, the schedule of the project, and the overall cost of the project. Once Sam and the project stakeholders acknowledge the risk of the hurricane they go on planning the project as if the risk is not likely to happen. What type of risk response is Sam using?

- A. Active acceptance
- B. Passive acceptance
- C. Avoidance
- D. Mitigation

**Correct Answer: B**

#### **QUESTION 9**

You are the project manager of a large project that will last four years. In this project, you would like to model the risk based on its distribution, impact, and other factors. There are three modeling techniques that a project manager can use to include both event-oriented and project-oriented analysis. Which modeling technique does NOT provide event-oriented and project-oriented analysis for identified risks?

- A. Sensitivity analysis
- B. Jo-Hari Window

- C. Expected monetary value
- D. Modeling and simulation

**Correct Answer:** B

**QUESTION 10**

You are the project manager of the GHY project for your company. This project has a budget of \$543,000 and is expected to last 18 months. In this project, you have identified several risk events and created risk response plans. In what project management process group will you implement risk response plans?

- A. Executing
- B. Planning
- C. Monitoring and Controlling
- D. In any process group where the risk event resides

**Correct Answer:** B

**QUESTION 11**

You are the project manager of QSL project for your organization. You are working with your project team and several key stakeholders to create a diagram that shows how various elements of a system interrelate and the mechanism of causation within the system. What diagramming technique are you using as a part of the risk identification process?

- A. Predecessor and successor diagramming
- B. System or process flowcharts
- C. Cause and effect diagrams
- D. Influence diagrams

**Correct Answer:** B

**QUESTION 12**

Bill is the project manager for a project that will last six months and has a budget of \$580,000. In this project a high-risk has been identified with the new materials the project will be using. Bill would like to assign one person, Beth, to be responsible to monitor this risk. Bill assigns Beth the authority to respond to the risk event if it appears in the risk events that is likely to happen. In addition, Bill hires a consultant to work with Beth on this area of the project. In this instance, who is the risk response owner?

- A. Bill, because he is the project manager
- B. Beth, because she has the authority to respond to the risk event
- C. Beth and the consultant are the risk owners
- D. The consultant working with Beth, because this is transference

**Correct Answer:** B

**QUESTION 13**

Nancy is the project manager of a project with 78 stakeholders. This is a high-profile project and she needs to express to her project team and to the management the importance of communication in this project. She would like to show the number of stakeholder communication channels in the project. Based on this information how many communication channels exist within this project?

- A. 156
- B. 3,003
- C. 78
- D. 6,084

**Correct Answer:** B

**QUESTION 14**

Thomas is a key stakeholder in your project. Thomas has requested several changes to the project scope

for the project you are managing. Upon review of the proposed changes, you have discovered that these new requirements are laden with risks and you recommend to the change control board that the changes be excluded from the project scope. The change control board agrees with you. What component of the change control system communicates the approval or denial of a proposed change request?

- A. Configuration management system
- B. Scope change control system
- C. Integrated change control
- D. Change log

**Correct Answer: C**

#### QUESTION 15

Fred is the project manager of the PKL project. He is working with his project team to complete the quantitative risk analysis process as a part of risk management planning. Fred understands that once the quantitative risk analysis process is complete, the process will need to be completed again in at least two other times in the project. When will the quantitative risk analysis process need to be repeated?

- A. Quantitative risk analysis process will be completed again after the cost management planning and as a part of monitoring and controlling.
- B. Quantitative risk analysis process will be completed again after new risks are identified and as part of monitoring and controlling.
- C. Quantitative risk analysis process will be completed again after the risk response planning and as a part of monitoring and controlling.
- D. Quantitative risk analysis process will be completed again after the plan risk response planning and as part of procurement.

**Correct Answer: C**

#### QUESTION 16

You are the project manager of the NNH project. In this project you have created a contingency response that the cost performance index should be less than 0.93. The NHH project has a budget at completion of \$945,000 and is 45 percent complete - though the project should be 49 percent complete. The project has spent \$455,897 to reach the 45 percent complete milestone. What is the project's cost performance index?

- A. 1.06
- B. 0.92
- C. -\$30,647
- D. 0.93

**Correct Answer: D**

#### QUESTION 17

You work as a project manager for BlueWell Inc. You are performing the quantitative risk analysis for your project. One of the project risks has a 50 percent probability of happening, and it will cost the project \$55,000 if the risk happens. What will be the expected monetary value of this risk event?

- A. Negative \$27,500
- B. Zero - the risk event has not yet occurred
- C. Negative \$26,000
- D. Negative \$55,000

**Correct Answer: A**

#### QUESTION 18

Joyce is the project manager for her company. Joyce and her project team are working through the quantitative analysis for certain risk events within her project. According to the enterprise environmental factors the project manager is to perform sensitivity analysis on any risk with an impact greater than \$5,000 in the project. What is the sensitivity analysis?

- A. It determines which risk events have the most potential impact on the project.
- B. It uses round of anonymous surveys to predict which events are most likely to happen.
- C. It uses rounds of anonymous surveys to predict probability and impact.
- D. It determines possible combinations of risk events to predict overall project success, failure, or probability of achieving project objectives.

**Correct Answer:** A

**QUESTION 19**

You work as a project manager for BlueWell Inc. You are preparing to plan risk responses for your project with your team. How many risk response types are available for a negative risk event in the project?

- A. Four
- B. One
- C. Three
- D. Seven

**Correct Answer:** A

**QUESTION 20**

You are the project manager of the GHY project for your organization. You are working with your project team to begin identifying risks for the project. As part of your preparation for identifying the risks within the project you will need eleven inputs for the process. Which one of the following is NOT an input to the risk identification process?

- A. Quality management plan
- B. Cost management plan
- C. Stakeholder register
- D. Procurement management plan

**Correct Answer:** D

**QUESTION 21**

Where can a project manager find risk-rating rules?

- A. Risk management plan
- B. Organizational process assets
- C. Enterprise environmental factors
- D. Risk probability and impact matrix

**Correct Answer:** B

**QUESTION 22**

As a part of monitoring and controlling the project, the project manager should update the risk register. The project manager should update the risk register with information on risk reassessment, risk audits, and periodic risk reviews. What other information should the project manager update the risk register with?

- A. Actual costs and schedule delays of risk events.
- B. Actual outcomes of risk management duties by the project team.
- C. Actual cost of risk events.
- D. Actual outcomes of the project's risks and of the risk responses.

**Correct Answer:** D

**QUESTION 23**

You are the project manager of the CUL project in your organization. You and the project team are assessing the risk events and creating a probability and impact matrix for the identified risks. Which one of

the following statements best describes the requirements for the data type used in qualitative risk analysis?

- A. A qualitative risk analysis requires fast and simple data to complete the analysis.
- B. A qualitative risk analysis requires accurate and unbiased data if it is to be credible.
- C. A qualitative risk analysis encourages biased data to reveal risk tolerances.
- D. A qualitative risk analysis required unbiased stakeholders with biased risk tolerances.

**Correct Answer:** B

**QUESTION 24**

You are the project manager for your company and a new change request has been approved for your project. This change request, however, has introduced several new risks to the project. You have communicated these risk events and the project stakeholders understand the possible effects these risks could have on your project. You elect to create a mitigation response for the identified risk events. Where will you record the mitigation response?

- A. Risk register
- B. Risk log
- C. Risk management plan
- D. Project management plan

**Correct Answer:** A

**QUESTION 25**

You work as a project manager for BlueWell Inc. You have declined a proposed change request because of the risk associated with the proposed change request. Where should the declined change request be documented and stored?

- A. Change request log
- B. Lessons learned
- C. Project archives
- D. Project document updates

**Correct Answer:** A

**QUESTION 26**

You are the project manager of the NKQ project for your organization. You have completed the quantitative risk analysis process for this portion of the project. What is the only output of the quantitative risk analysis process?

- A. Probability of reaching project objectives
- B. Risk register updates
- C. Risk response
- D. Risk contingency reserve

**Correct Answer:** B

**QUESTION 27**

Mark works as a project manager for TechSoft Inc. Mark, the project team, and the key project stakeholders have completed a round of qualitative risk analysis. He needs to update the risk register with his findings so that he can communicate the risk results to the project stakeholders including management. Mark will need to update all of the following information except for which one?

- A. Prioritized list of quantified risks
- B. Watchlist of low-priority risks
- C. Trends in qualitative risk analysis
- D. Risks grouped by categories

**Correct Answer: A**

**QUESTION 28**

The risk transference is referred to the transfer of risks to a third party, usually for a fee, it creates a contractual-relationship for the third party to manage the risk on behalf of the performing organization. Which one of the following is NOT an example of the transference risk response?

- A. Use of insurance
- B. Warranties
- C. Life cycle costing
- D. Performance bonds

**Correct Answer: C**

**QUESTION 29**

David is the project manager of the NKL Project for his organization. He has been asked to create a proposal for a construction project for a client. David realizes that there are several requirements within the SOW and RFP provided by the client that would eliminate his company from bidding on the construction project. David proposed to management that his organization create a partnership with a competitor so that together they could bid on the construction project and qualify for the customer's requirements. What risk response is David proposing to management?

- A. Exploiting
- B. Teaming agreement
- C. Transference
- D. Sharing

**Correct Answer: D**

**QUESTION 30**

Billy is the project manager of the HAR Project and is in month six of the project. The project is scheduled to last for 18 months. Management asks Billy how often the project team is participating in risk reassessment in this project. What should Billy tell management if he's following the best practices for risk management?

- A. Project risk management is scheduled for every month in the 18-month project.
- B. Project risk management has been concluded with the project planning.
- C. At every status meeting the project team project risk management is an agenda item.
- D. Project risk management happens at every milestone.

**Correct Answer: C**
