Vendor: SOA

Exam Code: S90-02A

Exam Name: SOA Technology Concepts

Version: Demo

QUESTION 1

Service intermediaries can be further classified as _____ or _____ depending on whether they modify message content. Select the correct answer.

- A. event-driven, dynamic
- B. active, passive
- C. composed or decomposed
- D. read-oriented, write-oriented

Correct Answer: B

QUESTION 2

Which of the following are valid HTTP methods? SELECT ALL THAT APPLY

- A. Get
- B. Upload
- C. Put
- D. Delete

Correct Answer: ACD

QUESTION 3

Which of the following statements make sense? SELECT ALL THAT APPLY

- A. I have 3 SOAP-based Web services, each with its own individual service contract.
- B. I have 3 REST services, all of which share the same uniform contract.
- C. I have 3 SOAP-based Web services, each with its own uniform contract.
- D. I have 3 REST services, each of which is designed to be accessed via the same set of HTTP methods.

Correct Answer: ABD

QUESTION 4

Most industry-standard WS-* features are designed to be implemented as: Select the correct answer.

- A. WSDL operations
- B. WS-BPEL definitions
- C. SOAP headers
- D. HTTP headers

Correct Answer: C

QUESTION 5

The HTTP protocol can be used together with SOAP-based Web services and REST services. Select the correct answer.

- A. True
- B. False

Correct Answer: A

QUESTION 6

SOAP messages contain headers that can be customized but are also used to implement industry-standard features provided by technologies, such as WS-Addressing. Select the correct answer.

- A. True
- B. False

Correct Answer: A

QUESTION 7

Which of the following statements are true? SELECT ALL THAT APPLY

- A. XML and XML Schema can be used to help define the technical service contract of a SOAP-based Web service.
- B. XML and XML Schema allow for the creation of data models that can be used by services, but can also establish a separate data architecture.
- C. XML and XML Schema are always used to define the structure of the underlying service logic as well as the component composition models the services may need to encapsulate.
- D. XML and XML Schema are important because when services are built as Web services, they must be used to define service scalability characteristics and thresholds, as established by the infrastructure.

Correct Answer: AB

QUESTION 8

Which of the following statements is true? Select the correct answer.

- A. Service agents are event-driven programs that always have published WSDL definitions.
- B. Service agents are event-driven programs that are automatically invoked to perform intermediary processing.
- C. Service agents are event-driven programs that are used only with asynchronous MEPs.
- D. Service agents are not event-driven programs.

Correct Answer: B

QUESTION 9

A SOAP-based Web service is essentially: Select the correct answer.

- A. solution logic that can only be accessed via HTTP methods
- B. solution logic accessible via binary RPC protocols
- C. solution logic that has been shaped by service-orientation design principles
- D. solution logic that can be accessed via a published WSDL definition

Correct Answer: D

QUESTION 10

Which of the following statements is false? Select the correct answer.

- A. The WS-I is an industry standards organization that provides basic profiles to help foster interoperability among solutions based on XML and Web services industry standards.
- B. OASIS is an industry standards organization that has developed a number of important technology specifications, including WS-BPEL and UDDI.
- C. The W3C is a standards organization that has developed a number of important technology specifications, including SOAP, WSDL, and WS-Addressing.
- D. The OAS-C is an industry standards organization that has developed a number of important technology specifications, including WS-Security and XML Schema.

Correct Answer: D

QUESTION 11

Which of the following statements is true? Select the correct answer.

- A. When using WS-AtomicTransaction, services participating in a transaction vote on the outcome so as to communicate whether the transaction should be rolled back or committed.
- B. When using WS-AtomicTransaction, services participating in a transaction use RPC protocols to communicate transaction results, so as to communicate whether the transaction should be rolled back

or committed.

- C. When using WS-AtomicTransaction, services participating in a transaction rely on the use of WS-Policy definitions to confirm the transaction results.
- D. When using WS-AtomicTransaction, services do not actually participate in a transaction. This specification governs intra-service transactions (transactions that occur within a service boundary) only. WS-BusinessActivity provides cross-service transaction protocols.

Correct Answer: A

QUESTION 12

Which of the following XML documents can be part of a SOAP-based Web service contract? SELECT ALL THAT APPLY

- A. WSDL definition
- B. HTTP definition
- C. XML schema
- D. WS-Policy definition

Correct Answer: ACD

QUESTION 13

Which of the following statements does not make sense? Select the correct answer.

- A. I built 3 SOAP-based Web services, each of which has its own published WSDL definition. 2 of the WSDL definitions share the same XML schema.
- B. I built 3 XML schemas, two of which are being shared by the same WSDL definition.
- C. I built 3 WSDL definitions and 3 XML schemas. Each WSDL definition is associated with its own XML schema.
- D. All of the above statements make sense.

Correct Answer: D

QUESTION 14

Which of the following technologies can be used to enable the exchange of data between services? Select the correct answer.

- A. SOAP
- B. HTTP
- C. WSDL
- D. All of the above.

Correct Answer: D

QUESTION 15

Which of the following statements is true? Select the correct answer.

- A. REST services primarily rely on the use of SOAP headers to exchange message metadata.
- B. REST services primarily rely on the use of JMS headers to exchange message metadata.
- C. REST services primarily rely on the use of HTTP headers to exchange message metadata.
- D. REST services do not exchange messages with headers.

Correct Answer: C

QUESTION 16

Which of the following statements is true? Select the correct answer.

- A. WS-ReliableMessaging establishes a framework that provides an industry-standard means of transforming XML schema-based data models.

- B. WS-ReliableMessaging establishes a framework that provides an industry-standard means of rolling back changes that occur during a runtime service transaction.
- C. WS-ReliableMessaging establishes a framework that provides an industry-standard means of reliably communicating policy enforcement rules.
- D. None of these statements are true.

Correct Answer: D

QUESTION 17

Using WS-AtomicTransaction you wrap 3 SOAP-based Web services in a single transaction. When it is time to vote on the outcome of the transaction, 2 of the services vote to commit the changes made during the transaction, but a vote from the third service is not received. What will happen? Select the correct answer.

- A. The changes are committed because the transaction is considered successful as long as no Abort votes are received.
- B. The changes are rolled back because the transaction is considered unsuccessful when there is a missing vote.
- C. The changes are committed because the transaction is considered successful as long as one Commit vote is received.
- D. The changes are aborted because a transaction can only be considered successful when more than 2 Commit votes are received.

Correct Answer: B

QUESTION 18

XSLT is a technology that is primarily used to address _____ . Select the correct answer.

- A. technology protocol bridging requirements (such as when .NET and Java components need to speak to each other)
- B. data model transformation requirements (such as when similar data based on different XML schemas needs to be exchanged)
- C. layer transformation requirements (such as when data located in different architectural layers needs to be exchanged between architectural layers)
- D. service transformation requirements (such as when two versions of the same service exist)

Correct Answer: B

QUESTION 19

WS-BPEL process definitions can be encapsulated by and exposed as SOAP-based Web services. Select the correct answer.

- A. True
- B. False

Correct Answer: A

QUESTION 20

Which of the following statements makes sense? Select the correct answer.

- A. I have 3 REST services, 2 of which do not support the PUT method.
- B. I have 3 REST services, 2 of which have a PUT operation in the SOAP header schemas of their WSDL definitions.
- C. I have 3 REST services, 2 of which do not support HTTP.
- D. None of these statements make sense.

Correct Answer: A

QUESTION 21

Messages transmitted using WS-ReliableMessaging are typically _____ into _____. Select the correct answer.

- A. decomposed, HTTP methods
- B. parsed, WS-Policy definitions
- C. grouped, sequences
- D. converted, comma-separated-value (CSV) files

Correct Answer: C

QUESTION 22

When designing REST services within a given domain, you establish _____ that are represented by unique identifiers, usually in the format of _____. Select the correct answer.

- A. resources, HTTPs/HTTPSs
- B. mashups, HTTPs/HTTPSs
- C. resources, URLs/URIs
- D. mashups, URLs/URIs

Correct Answer: C

QUESTION 23

Which of the following statements is true? Select the correct answer.

- A. WS-BusinessActivity is used for short-running, ACID-style transactions that can be rolled back to their original state.
- B. WS-BusinessActivity is used for long-running transactions that are not expected to be rolled back to their original state.
- C. WS-BusinessActivity provides an alternative to WS-Coordination.
- D. None of these statements are true.

Correct Answer: B

QUESTION 24

An XML schema can be used to define XML documents that can be shared by components, SOAP- based Web services, and REST services. Select the correct answer.

- A. True
- B. False

Correct Answer: A

QUESTION 25

A SOAP message is an XML document that is comprised of a set of pre-defined parts. Which of the following are parts that can be found in a SOAP message? SELECT ALL THAT APPLY

- A. Envelope
- B. Body
- C. Header
- D. Footer

Correct Answer: ABC

QUESTION 26

Data model transformation is a core service function that can be performed by proven technologies that have been around for years. Therefore, it is recommended that you look for opportunities to apply this technology wherever possible, especially in larger, more complex service compositions. Select the correct

answer.

- A. True
- B. False

Correct Answer: B

QUESTION 27

A SOAP-based Web service is required to transmit an XML-based invoice document to a REST service. However, the SOAP-based Web service is designed to represent invoice data using an XML schema that is different from the XML schema used within the REST service. How can the disparity between the XML schemas, used by these two services, be overcome so that they can exchange the invoice document? Select the correct answer.

- A. A layer of data format transformation logic needs to be introduced based on mashup technologies, such as DTD and WS-Transform.
- B. A layer of protocol transformation logic needs to be introduced based on Web technologies, such as HTTP and FTP.
- C. A layer of data model transformation logic needs to be introduced, based on XML technologies, such as XSLT.
- D. There is no technique or technology for overcoming differences between XML schemas.

Correct Answer: C

QUESTION 28

Which of the following can be part of technical service contract? Select the correct answer.

- A. WSDL operation
- B. component method
- C. HTTP method
- D. Each of the above can be part of a technical service contract, depending on which technology platform is chosen to build the service.

Correct Answer: D

QUESTION 29

Which of the following statements is true? Select the correct answer.

- A. WS-Policy allows for the definition of policies that can be ignored by service consumers.
- B. WS-Policy allows for the definition of procedure-related policies that can be attached to database tables.
- C. WS-Policy allows for the definition of MEP policies that are limited to outbound MEPs only.
- D. None of these statements are true.

Correct Answer: A

QUESTION 30

Which of the following statements is true? Select the correct answer.

- A. WS-ReliableMessaging standardizes reliability levels associated with databases required to persist state data.
- B. WS-ReliableMessaging standardizes the issuance and delivery of positive and negative acknowledgement messages.
- C. WS-ReliableMessaging standardizes SOAP headers related to atomic transactions with rollback features.
- D. WS-ReliableMessaging standardizes the expression of service composition logic, but only for SOAP-based Web services.

Correct Answer: B

QUESTION 31

Which of the following statements makes sense? Select the correct answer.

- A. I designed a unique XML schema for each of my REST services so that the HTTP methods used by these services are consistently named.
- B. My REST services are limited to the use of the GET HTTP method because only one XML schema was designed for all of them. In order to support additional HTTP methods, additional XML schemas will need to be designed due to the inherent dependency HTTP has on the XML Schema Definition Language.
- C. I designed my REST services to share the same XML schema.
- D. XML schemas cannot be used by REST services.

Correct Answer: C

QUESTION 32

Identify what is wrong with this statement: "SOAP-based Web services A and B are participating in a runtime transaction that is carried out as per the WS-AtomicTransaction standard. When a message sent by Service A is rejected by Service B due to a violation of a WS-Policy definition expressed as part of the Service B contract, Service A is forced to issue an Abort message, thereby requiring the transaction to be rolled back." Select the correct answer.

- A. WS-AtomicTransaction does not support the rollback of changes that occur during runtime transactions.
- B. WS-Policy definitions are not expressed as part of the service contract.
- C. SOAP-based Web services cannot have policies and cannot participate in runtime transactions because they are limited to the use of a uniform service contract.
- D. There is nothing wrong with this statement.

Correct Answer: A

QUESTION 33

It is possible to have 3 SOAP-based Web services, each with a WSDL definition that has an operation named Update. Select the correct answer.

- A. True
- B. False

Correct Answer: A

QUESTION 34

MEP stands for: Select the correct answer.

- A. Message Extension Pair
- B. Message Exchange Pattern
- C. Mixed Entry Platform
- D. Mixed Elevation Program

Correct Answer: B

QUESTION 35

WS-BPEL is a technology that can be used to express service composition logic for SOAP-based Web services. Select the correct answer.

- A. True
- B. False

Correct Answer: A
